

NEWS ITEMS FROM JARROW

Mrs. T. Pendle, Messrs. Barton, Boyd, W. Matthews and Christenson were city visitors last week.

Rev. R. W. Griffith was invited to visit a Welsh settlement at Woodrider, Alberta, Sunday, February 28th, to preach Welsh in the morning and English in the evening, also to remain for Monday (St. David's Day) and give an address on St. David, the Patron Saint of Wales. He returned home on Tuesday.

Rev. Kemp of Irma preached at Kinsella and Jarrow last Sunday evening owing to the absence of the pastor. His services were much appreciated.

The Jarrow Ladies' Aid convened at the home of Mrs. P. McNabb on Wednesday, March 3rd.

The influenza epidemic is still with us. Nearly every family has been subject to its ravages. The Harper family have all been ill but are now recovering.

Mrs. R. W. Griffith attended the meeting of the Presbyterian of the Women's Missionary Society, which was held in the United Church at Wainwright last Thursday and Friday. Delegates from Tofield, Ryley, Holden, Viking and Irma were present. Splendid reports were given by the various Presbyterian secretaries. The addresses were full of inspiration and the discussions educational.

Mrs. A. McGregor spent the week-end in Edmonton.

Mr. Andrew Firkus was united in marriage in the city of Edmonton to Miss Mary Rawluk, daughter of Mr. and Mrs. Harry Rawluk of Jarrow.

ALMA MATER NEWS

Once again Alma Mater came in to the limelight with a 3-4 win over the Roseberry Canadians at Alma Mater. In spite of the fact that both teams were handicapped by a shortage of players, the game was fast and rough. Well on in the first period J. Burton scored the opening goal for Alma Mater. B. Patterson scored on a rebound from a shot by J. Burton.

In the second period the Canadians evened up the score with two quick goals.

The third period began with the Canadians short handed, their manager being in the penalty box for tripping. Although Alma Mater put on the pressure they were unable to take advantage of this penalty. Later on C. Glover scored Alma Mater's 3rd goal, but the Canadians came back strong and scored again to tie it up at 3-3. With about one minute to go B. Patterson scored the last and deciding goal on a pass from C. Glover behind the Roseberry net. With the Canadians in a desperate last-minute rally and Alma Mater trying to hold their one-goal lead, the game ended in a near riot with everyone body checking when they weren't picking themselves up off the ice.

Both goal keepers played a good game and stopped numerous hard shots.

The Line-Ups

Alma Mater—Renwick, I. Goodale, C. Glover, E. Goodale, B. Patterson, J. Burton, L. Thurston.

Roseberry—Lewis, B. Lawson, H. Oldham, A. Cook, G. Wilson, F. Younker, M. Walker, B. Walker, J. Haun, M. Younker.

Referee: R. W. Patterson.

On Alma Mater's last visit to Roseberry they once again shut out 3-0. Alma Mater goals scored by J. Burton, B. Patterson, B. Ink. Once again the credit goes to Shutout Renwick.

Recent Bride Complimented

A delightfully arranged miscellaneous shower was held at the home of Mrs. Arnold last Saturday evening, the guest of honor being Mrs. L. Alexander, a recent bride. The living rooms were tastefully decorated with streamers and wedding bells, in a color scheme of pink and white. During the evening Mrs. Pryce Jones delighted the many guests by singing "An Old Fashioned Wife." A prettily decorated "wishing well" occasioned a good deal of merriment, finally disclosing itself as the hiding place of many assorted, useful and beautiful gifts, which the complimented guest was invited to open. Mrs. Alexander very feelingly expressed her appreciation in a few carefully chosen words. Dainty refreshments, served by the hostess, brought a really enjoyable evening to a close.

Another Pioneer Passes To the Great Beyond

The Irma district lost another of its pioneers on Sunday, February 21, when Wm. H. Whitley of Passchendale passed peacefully away in his 85th year.

Born at Hunstet, near Leeds, Yorkshire, in 1852, he came to New York with his parents when only nine months old. Moving later to Pennsylvania, Boston, Sherbrooke, Que., Ottawa, and Toronto, before coming to Irma in 1907, where he has resided ever since.

When in Quebec he joined the 53rd Battalion as bugler at the age of 14, and held a Fenian raid medal with bar for 1866 and 1870, also long-service medal in the same battalion.

He was a member of the Masonic order, having reached the degree of Knight Templar, although he took no active part since coming west.

He was predeceased by his wife, Aurilla Brown Whitley, August 10, 1936, and leaves to mourn his loss four daughters, Mabel, Helen, Gladys in Toronto, and Katie (Mrs. J. Little) in California, and one son, G. N. Whitley residing in the Passchendale district; one brother, B. R. Whitley, Cloverdale, B.C., and a sister, Mrs. John Parr, in Buffalo, N.Y.; besides a host of friends in the Passchendale district.

The funeral services were held in the Irma United Church on Wednesday, February 24th, and were conducted by the pastor, the Rev. Mr. E. F. Kemp, who preached a very impressive and appropriate sermon. Assisted by the choir, the hymns sung were "Blest be the tie that binds," "Jesus Lover of my Soul," and "I Heard the Voice of Jesus Say."

The pall bearers were Messrs. J. A. Thompson, John Dalton, R. L. Shotts, F. Ford, S. M. New and W. Goodwin.

Beautiful floral tributes were received from the following: Gordon, Elsie, Billie, Bobbie and Florence; Mabel, Helen, Gladys and Katie; Bro. Ben and Sister Hattie; Mr. and Mrs. S. M. New; Mr. and Mrs. Caesar, Frank Ford and family; Wm. Dalton and Dorothy; Mr. and Mrs. McFarland; Mr. and Mrs. Frickleton; Mr. and Mrs. Goodwin and family.

The sympathy of the community goes out to the bereaved family.

SOCIAL EVENING

On Friday, March 19th, in the lodge hall, Irma. Cards at 8.30 sharp.

Lunch served. Good prizes. Snappy music for dancing. Irma L.O.B.A. Admission, 35c each.

HOCKEY!

(From the Viking News)

Wainwright 4 - Viking 2

The Viking boys lost to the Duplel Forts of Wainwright in the second game of the semi-finals, but won the round 11 to 8, by virtue of their first game win at home by 9 to 4.

The game was fast and furious from the opening bell, with Wainwright forcing the play all the way, but the hard back checking and the unbeatable goal keeping of Laurie kept the Duplel at bay. The game was fast and wide open but when the Redshirts did break away Miles in goal for the Duplel kept the cage free of rubber, and the period ended without a score.

The second stanza was very fast, and Wainwright's first string of Brimacombe, Ganderton and Coutts, made things tough for Laurie. They finally broke through for a tally, on a three-way passing combination, with Coutts sending the rubber. The Redshirts came back strong however and on a couple of break-aways gave Miles no chance with McLaren scoring on a pass from Hardy, and Hardy on one from McLaren. This ended the scoring in the second and the Viking boys skated off the ice with a 6 goal lead on the series to protect them in the third period.

The last stanza, the Wainwright boys came out with a do or die spirit and literally stormed Laurie in the nets for Viking. They finally scored when one of Viking's players in attempting to clear shoved the puck past Laurie and hung up a counter for Wainwright. Not disheartened by this tough break, the boys played splendid hockey and kept the hard-pressing Duplel in centre ice. Coutts finally scored again for Wainwright and the final bell found the Duplel shooting at Laurie from all angles, but couldn't get the puck to go in.

The games in the final play-off

Hockey Notes

The Irma boys lost out at Wetaskiwin last week in the Black competition. According to reports the Irma team could have been given a fair deal in which case there is no telling what the result would have been. At any rate the Colonels were given a run for the cup.

The gas line league play-off games between Viking and Irma are starting this week. The weather has warmed up this week and is playing havoc with the ice on these open rinks.

The Orbindale junior and senior hockey teams arrived in Irma last Saturday evening for a couple of games. The Juniors played their game first and resulted in a win for the Irma boys by a score of 4-1.

Although the score was one-sided it was a fairly good game. J. Sharkey scored the first goal and H. Guitner the second. The third goal was scored by A. Glasgow assisted by J. Sharkey. R. Guitner was credited with the fourth on account of one of the Orbindale players throwing his stick at the puck as Robert was rushing towards the goal with it.

Shortly before the end of the game C. Y. Lukens assisted by R. McKinnon scored the only goal for the visitors.

The line-up was as follows: Orbindale: Babe Prior, W. Glover, R. McKinnon, C. Lukens, J. Goodwin, W. Whiteley, F. Meyers, W. Parsons and E. Oldham.

Irma: Inklin, L. Jones, R. Guitner, R. Simmermon, J. Sharkey, A. Glasgow, A. Carter, C. Carter, C. Jones, A. Knudson and H. Guitner.

Referee, R. Maguire.

The second game was played by mixed teams made up of senior and junior players from both Orbindale and Irma, and was won by Irma.

Irma Juniors Tounce Wainwright

The Irma boys seeking revenge from a 2-0 defeat at Wainwright two weeks ago, came back hard to defeat the Wainwright boys 4-0. Allison Carter started the scoring for Irma in the first period, on a pass from A. Glasgow. In the second period A. Glasgow netted a counter for Irma on a pass from B. Simmermon. Then B. Simmermon closed the period with another goal for Irma on a pass from J. Sharkey. In the final period J. Sharkey got Irma's last counter-unassisted. All the penalties of the game went to the Irma boys. L. Jones got 2; A. Larson 2; and B. Simmermon 1. A fair sized crowd witnessed the game.

Irma line-up: Larson (Goal); Defence—L. Jones, A. Larson, B. Simmermon, H. Guitner; Forwards—A. Glasgow, J. Sharkey, A. Carter, A. Knudson, C. Jones, C. Carter.

For Job Printing see E. W. Carter.

with Irma are scheduled to start this week and we say Viking will win in four games. Come out and see some real hockey and give the boys your moral and financial support.

BRUCE BARBER KILLED BY LOAD OF LOGS

Many friends in Shawville and surrounding district were shocked to learn on Thursday morning of last week, that Bruce Barber, had been killed by a load of logs in the Coulouge river district on the previous evening.

Details of the accident as told by Mr. B. French to the brother-in-law of the victim, Mr. W.D. Hodgins, were that a teamster with a load of logs became anchored at the top of a sand hill and the foreman, with Bruce and several other men went to his assistance. It was decided to remove the load by the block and line method, and the team was unhitched. Some of the men grasped the tongue of the sleighs to straighten the load on the road, when it quickly released and started down the hill. The foreman shouted a warning and the men jumped to both sides of the road, but the sleighs swerved suddenly to one side overtaking Bruce, and in a strange manner he was trapped beneath the load. The load was quickly thrown off and it was discovered the man was dead, his body being deeply embedded in the snow.

The accident was reported to officials at the Jobail depot about ten miles distant, where the deceased's brother-in-law, W.D. Hodgins and nephew, Willie Hanna, were stopping.

The body was taken into camp and conveyed by sleigh out to the main road and on down till met by a truck dispatched from Campbell's Bay. Arriving at Campbell's Bay the remains were viewed by Coroner Renaud, and later brought to W.J. Hayes' Undertaking Parlor in Shawville, where a further examination of the body was made. As the body showed no marks or mutilation of any kind, it is presumed death ensued from pressure or suffocation.

The late Mr. Barber had been employed by Gillies Bros. Lumber Co., for about a month, leaving his home with a load of supplies about Jan. 20th, and arriving at the J.B. depot was engaged to haul logs.

The funeral was held on Sunday afternoon, from the late home of the deceased, to Shawville United Church, which was crowded beyond capacity with sympathetic relatives and friends representing the entire district as well as many from distant points. Service was conducted by the Pastor, Rev. A.F. Fokes, who was assisted by Rev. J. Woodland, of Holiness Movement church. Mr. Fokes preached a very comforting and impressive sermon from the scripture passage, Psalms 86:7, "In the day of trouble, I will call upon Him for He will answer me". As a special number the choir sang, "Angels of Jesus".

Congregational hymns were, "Rock of Ages", "Safe in the Arms of Jesus" and "We Cannot Think of Him as Dead."

Interment was made in Maple Grove cemetery, the pall-bearers being, Messrs. H. H. Sturgeon, Herb Hodgins, Garret Walsh, Jas. Connelly, Graham Thompson and Wesley Hynes.

The numerous letters, communications and the large number of beautiful floral expressions received testified to the sympathy felt for the bereaved and the high esteem in which the deceased was held.

Simon Andrew Bruce Barber was born in Clarendon, April 24, 1889, the youngest son of the late Mr. and Mrs. Simon Barber. He remained at home with his parents until the spring of 1908, when he went west to his brother, Willie, who was located near Irma, Alberta, and took up a homestead nearby. In 1911 he was united in

NOTES OF INTEREST OF BUSY KINSELLA

BRIGGS — CORMACK

A quiet wedding was solemnized at Third Avenue United Church manse in Saskatoon, on February 20th, by Rev. F. Williams, when Ella Jean Cormack, daughter of Mr. and Mrs. R. Cormack of Kinsella, Alberta, became the bride of William Edward Briggs, son of Mr. and Mrs. W. E. Briggs, of Edmonton.

Mr. and Mrs. Briggs will make their home in Rosetown, Sask.

Miss Kay Ferries, of Edmonton, held a shower on Tuesday, February 16th, for Miss Ella Cormack. The Kinsella girls present were, Miss Dorothy Williams, Miss Isobel McKie and Miss Margaret Scott.

Mr. and Mrs. J. Neale spent a few days in Edmonton last week.

Mrs. D. Corbett spent several days in Edmonton last week.

Rev. Mr. Kemp of Irma preached in Kinsella last Sunday, the Rev. Mr. Griffith being away.

Mr. B. Wachter spent the week-end at his home.

Mr. and Mrs. B. Wachter were the prize winners at the W. I. whist drive Saturday night.

Messrs. Robert and Lloyd Witton and Miss V. Murray motored to New Norway on Sunday.

"SAFETY FIRST"

An amusing farce in three acts, "Safety First," will be presented by the Kinsella Ladies' Aid on Friday, March 12th, at 8.30 p.m.

Admission: Adults 30c, children 15c. Two prominent society men learn that telling the truth, no matter how bad, is better than their motto, safety first.

The cast, in order of their appearance: Mabel Montgomery, Jack's wife—Patricia Stronach.

Many Ann O'Finerty, an Irish cook—Georgina Lee.

Elmer Flannel, awfully shrinking—Pender Smith.

Virginia Barrington Bridges, Mabel's young sister—Florence Syson.

Abou Ben Macha, a terrible Turk—Stanley Sewinski.

Mrs. Barrington Bridges, the mother of Mabel and Virginia—May Davis.

Jerry Arnold, an unsuccessful fixer—Yankee Watson.

Jack Montgomery, a young husband—George Taylor.

Mr. McNutt, a defective detective—Bruce Davis.

Zuleika, a Turkish maiden—

Come and bring the family. There's a laugh for every minute.

marriage, at Irma, to Miss May Palmer, daughter of Mr. Thomas Palmer and the late Mrs. Palmer, of Yarm. Que. After a few years he disposed of this property and went first to the Kinsella district, and a few years ago moved to the Quinte district near Viking.

During June of the past year, he with his brother, Willie, came east to visit relatives, and returning to Alberta in July, found that his crop had been hauled out completely, and as he had suffered similar losses for several years in succession, decided to dispose of his moveables, etc., and come east. So during the month of August, he with his wife and nine children arrived here, taking up residence in the late home of the deceased's father, on the 5th concession. One son, Willie, arrived later by train, and the eldest daughter (Iva) Mrs. Hillson Hodgins, and the second son, Arthur, reside at Viking.

Left to mourn the loss of a devoted husband and father, are the sorrowing widow and family of six sons and six daughters, namely, Gordon, William, John, Amy, George, Myrd, Glen, Isabel, Susan, and Lois, at home, and Mrs. Hodgins and Arthur, as above stated; also two brothers and two sisters, Eddie, of Clarendon; Willie, of Irma, Alberta; Mrs. W. D. Hodgins, Litchfield, and Mrs. Ira Hanna, Radford.

The late Bruce Barber was a man of cheerful, good natured disposition and one who made friends wherever he went. — Shawville Equity.

United Church Notes

Attendance both at the Sunday School and Church service is increasing after the decline owing to the epidemic of flu and measles. After dropping as low as 40, figures for the Sunday School are nearer to the 100 mark, and it is confidently expected that between now and Easter this mark will be passed. The congregation at Church last Sunday evening also was most encouraging, and friends and members are especially urged not to absent themselves from divine worship before Easter, during this Lenten season. The sermon subjects for the Sundays will be in keeping with the season. Service in the Irma Church next Sunday, March 7th, at 7.30 P.M.

The pastor will arrange for a service of infant baptism, if parents desirous of having their children baptised, will notify him at as early a date as convenient. Possibly this service might be arranged for Easter Sunday, which would be a most suitable occasion.

The next debate in the Presbyterian contest will be between Young Peoples' Union of Tofield and Irma. The resolution to be debated is as follows: Resolved that the practice of instalment buying has harmful social and economic effects. The Tofield Union chose the subject so the Irma Union will have the privilege of choosing which side they will take. It has not yet been decided where the debate will be held, but it will be within the next week or two. The winning team of this debate will tery, against another Presbytery in the Provincial contest.

Owing to the illness of Rev. R.E. Finlay of Hardisty, who is unable to take his pulpit for six weeks or so, neighboring ministers have been invited to supply for him during this period; and the pastor has agreed to take the service there on March 21st.

It is expected that the service in the Irma Church on this date will be in charge of the Young Peoples' Union. Definite announcement will be made later.

"Christianity is a religion which shames men into goodness by treating them better than they deserve." From a Lenten devotional booklet.

ALBERT DISTRICT NEWS

Fire, believed to have originated by a spark from the chimney igniting the roof, had made serious headway before being noticed in the C. L. Currie home here, last Wednesday morning. Herculean efforts of the neighbors and J. Carter (mailman) and J. McLean of Irma, saved the building from destruction. In addition to the damage to the roof, articles of clothing and bedding were destroyed and the interior of the house injured by smoke and water.

Owing to the prevalence of measles and flu a temporary ban has been placed on social gatherings at the school house. Folks on the sick list include: Mrs. Bailey, Mrs. Lukens, Wilma and Clara Currie, W. Ramsay Jr., Ivan Hardy, Robin Johnson and the Bars, Fleming and Jones families.

D. H. Currie and the party of young folks he conveyed to the Bush Mines - Irma hockey game at Irma, Wednesday night, found the return journey, owing to a blizzard and filling roads, so arduous that they finally left the car in a snow drift and finished the remaining five miles on foot.

TEACHERS' ALLIANCE

The executive of the Viking-Wainwright district local of the A. T. A. met at Wainwright on Saturday, 27th February, for the purpose of drafting the constitution. It was arranged to hold a special business meeting in Wainwright at 1.30 p.m. on Saturday, March 13th, to present this constitution, to appoint committees, to appoint delegates for the Easter convention, and for a preliminary discussion of the spring games meet. Every teacher in the district is invited to attend this meeting. — M. Wittmann.

THANKS ELECTORS

I wish to convey my thanks to all those who supported me at the recent Councillor election, and I also wish to ask for the co-operation of all the ratepayers in carrying on the business of Division 5 during my term of office. — W. T. Steele.

ALL ROADS LEAD TO IRMA, ON Wednesday, March 10

when the Ross Players will present the play of the year —

"For Pete's Sake"

under the sponsorship of Irma L.O.L. No. 2066

Play starts at 8.15 sharp and will be followed by a
DANCE — GOOD MUSIC — LUNCH SERVED

Admission: Play and Dance 35c each; Dance only 25c each.

Dust Storms In The South-West

Strip Farming Methods Of Control Have Shown Good Results

Soil drifting is one of the most serious drawbacks to farming in most of the Great Plains area where the practice of frequent summer-fallowing is of necessity followed. A large percentage of the cultivated land is kept free of vegetation each year in order to conserve moisture and ensure a better crop the following season. This land is often subject to drifting at any time of the year, unless some precautions are taken. The practice of strip farming along with trash covers and surface cultivation has given excellent results and prevented drifting even during the most severe wind storm.

On the second of December a severe wind storm struck the prairies. The light covering of snow was soon blown to the ditches and coulees and the bare unprotected fallow fields were at the mercy of the wind. Clouds of dust rose over large fields, and visibility on adjacent roads was reduced to a point unsafe for traffic. Areas of lighter soil that had lost their protective cover suffered severely and roadways were piled high with drifted sand.

Windstorms such as this caused widespread damage in the past, but soil drift control measures recently adopted have proved beyond doubt that serious losses can be avoided. An inspection covering many miles revealed that protected fields suffered no damage. The advantages of strip farming as a method of control were quite marked, particularly so when used in conjunction with trash covers.

This method of control is being widely advocated throughout the Prairie Provinces, and appears to have fewer disadvantages than have previously anticipated. Many have practised this method of farming for years, and prefer to accept the few inconveniences rather than take the risk of losses on large unprotected fields.

Cover cropping is also practised with success in favourable areas, and maintaining a lumpy surface is effective on suitable types of soil. Regardless of methods employed, there is sufficient evidence of progress available at the present time to indicate that, providing proper methods are employed, the soil drifting menace will ultimately be brought under control.

Further information concerning the most suitable methods of soil drifting control in the various districts may be obtained from the Dominion Experimental Farms.

Coachman Wanted

Mayor Of Liverpool Needs Man Who Can Drive A "Four-in-Hand"

Liverpool is advertising far and wide for a man who is competent to drive the Lord Mayor's "four-in-hand."

In civic pomp Liverpool goes some of the way with the Lord Mayor of London. His Lordship of the Mersey city has a four-horse state coach, for instance, not so large and gut-covered, and not so lumbering as the historic coach which ambles from the Mansion House on Nov. 9, but all the same quite impressive.

The Lord Mayor of Liverpool's coachman, Edward Elson, has retired on pension, and some difficulty is found in naming his successor. To drive a four-in-hand coach needs, a long apprenticeship, and as there are very few of these equippages left the profession of driver is not overcrowded.

There has even been some talk of relegating the coach to the city museum. It was built in 1820 and has only needed repair twice. Elson drove it for 30 years and never had a mishap.

The wages of the potential Lord Mayor's coachman are fixed at £3 15s. (\$18.75) with no overtime. A house, fuel and light are also provided.

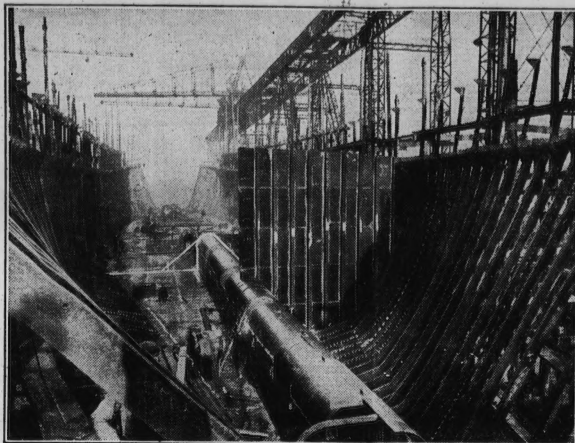

Filmed In Color

British Movietone News announces that negotiations have been concluded giving it exclusive rights to film the coronation procession in color. Forty cameras will be used and 40,000 feet of film exposed, 20,000 feet of which will be in color and a similar length in monochrome. The color production of the ceremonies will be supplementary to the black and white production.

It's pretty hard luck to smell the perfume you bought your best girl floating past you as she goes to the movies with another fellow.

A spider, native to Australia and measuring only one-fortieth of an inch, is said to be the smallest of this insect-like class.

BRITISH SHIPBUILDERS "SNOWED UNDER" WITH ORDERS

The shipbuilding yards on the Tyne are enjoying a wave of unusual prosperity, and it is estimated that contracts of a value of over \$100,000,000 are being carried out. Though much of the work is being done for the British Admiralty, there are many commercial orders on hand. This photograph shows a huge oil-tanker under construction. The cylindrical steelwork in the foreground is the propeller shaft tunnel.

Started Quarter Century Ago

Monument To Edward The Peacemaker Not Yet Completed

Truth and Justice rest in Ottawa in an old building next door to a once roaring hotel—waiting for Edward the Peacemaker. They have waited 13 years and may wait in vain.

Truth and Justice, 10 feet tall, were moved to Ottawa from the Toronto studio of Walter S. Allward, creator of the Canadian memorial at Vimy Ridge, to form part of a great monument to Edward VII, the "Peacemaker."

A quarter century ago Allward won a competition that gained him a commission to create a bronze and granite memorial, commemorating the late King Edward. His design was selected from 49 entries because a jury decided it conveyed more than the others a sense of peace, security and power.

Before Allward could start work the Great War broke out. Allward waited till 1922, then went to Europe to begin work. A new difficulty arose. Prices of bronze and granite had skyrocketed and cost of the materials for the monument reached a figure far higher than the \$35,000 earmarked for the work.

But he finished the figures in 1924 and shipped them to Ottawa. Today they're in storage, awaiting the day when conditions permit completion of the complete memorial and choice of a site.

The Average Englishman

Following Conclusions Were Deduced From A Recent Survey

Who is the average Englishman? The London Dispatch conducted a survey and came to these conclusions: He is thirty years old, has been married three years, has one child. He is just short of five feet, eight inches tall. His favorite color is socks and sea is blue. Gray is next. He prefers "mousetrap" cheese to Gorgonzola or Camembert. His Sunday dinner is composed of roast beef, baked potatoes and Brussels sprouts. He likes apple desserts. He doesn't go to church but denies he is an atheist, shies at the word "agnostic." By preference he reads detective and mystery stories, biographies and travel books. He reads no romantic novels, no poetry, no philosophy, although he will buy a book on health efficiency if it does not cost more than fifty cents. He won't answer questions about his secret aspirations or physiological reactions. Literary Digest.

Highly Exhilarating

According To Professor Goldfish Enjoys Being Frozen

Dr. Paul C. Saunders, a university professor, has found in experimenting with goldfish that the fish are not injured by being frozen solid but rather seem to enjoy the experience. The professor freezes the goldfish by dropping them in a beaker containing liquid air. He then places the frozen fish into a beaker of cold water and within a few moments it begins to wiggle. Soon it is swimming actively.

The oxygen in the liquid air is highly exhilarating, according to Dr. Saunders.

He said the same fish has been frozen as often as four times a day without permanent injury, and that most of his specimens die of old age.

The world's smallest republic is Andorra. 2190

Change In Coronation Oath

Present Status Of Dominion Makes New Form Necessary

Constitutional changes in the status of the Dominions since the coronation of George V. in 1911 will be reflected in a new form of coronation oath when King George VI. is crowned at Westminster Abbey, May 12.

The Earl of Clarendon, Governor-General of South Africa, announced at the opening of that Dominion's Parliament that a bill dealing with the form of the oath would be introduced. Similar bills will be introduced in the parliaments of Great Britain, Canada, Australia, New Zealand and probably the Irish Free State.

At George V's coronation, the Archbishop of Canterbury said: "Will you solemnly promise and swear to govern the people of the United Kingdom of Great Britain and Ireland, and the Dominions thereto belonging, according to the statutes in parliament agreed on, and the respective laws and customs of the same."

The King answered: "I solemnly swear so to do."

With the Dominions having full equality, as set forth in the statute of Westminster, it is felt that the phrase "the Dominions thereto belonging" is no longer suitable.

Chess Moves On Postcard

Tournament With Players Scattered Across Canada Will Last Year

Carefully deliberated moves will be marked on postcards by 25 members of the Canadian Correspondence Chess Association who will carry on an organized tournament to last a year. The players are scattered across the Dominion. "There are between 30 and 40 moves to a game, therefore that number of cards exchanged between the players," said George Underhill, secretary, who has 20 different games going on by mail.

Farm Placements

Farm placements in Saskatchewan under the federal bonus plan have exceeded all previous records. Up to the middle of January, 22,352 men and women, some of them married couples, had been placed. To the same date a total of 28,068 applications had been received.

There are 1,864,643 miles of copper telegraph lines in America.

Tough On The Movie Fan

Writer Charges 95 Per Cent. Of Theatre Audiences Are Not Intelligent

Pearl Buck, writer, charged that 95 per cent. of theatre audiences were unintelligent and that "organized" censors are less a menace than the enormous, stupid, insistent censorship of the mass mind." Demanding trashy books, plays and movies.

Addressing the 13th annual conference of the national board of review of motion pictures, the author of "Good Earth" characterized the average motion picture as "abominable fodder."

She urged establishment of a new system of writing and movie producing alongside the present system. If necessary, with artists making quality products "for honor, not for money," for audiences as limited as 5,000 in the case of books and 10,000 in the case of movies.

In the theatre, Miss Buck said, "only five per cent. of the audience are intelligent. A good play fails because the rest aren't interested in it."

Reformed Calendar

Many Different Plans Are Submitted To League Of Nations

The League of Nations is taking in hand again a job started 13 years ago—the calendar.

The new committee will find that more than 180 different schemes have been submitted to the league, including years of 10 months, each of six days; 12 months of 30 or 31 days, with 60 Sundays and only five Saturdays at the end of the five 31-day months; 12 30-day months each of six five-day weeks, and scores of 13-month years each of 28 days.

The simplest schemes have 12 months making 364 days with various methods of intercalating the 365th day, and 366th day of leap years as holidays outside the week and month. Many chambers of trade, British and foreign, advocate a year of 13 months, each of 28 days.

Extremely hot weather is necessary to freeze hailstones. Only in hot weather are the upward rushing air currents powerful enough to sweep raindrops up into a freezing atmosphere.

A scientist has estimated that all the clouds on earth rolled into one mass would weigh 613,800,000 pounds.

"Why do you think I am drunk just because I'm taking a bath?" —Lustige Blätter, Berlin.

Defends Famous Spinsters

Chicago Minister Names Ten To Whom World Owes Much

The Rev. Clinton C. Cox of Chicago took up the cudgels for old maids of whatever age or clime. The world, he declared, owes a lot to spinsters—and "it is time it recognized it."

He undertook to do his bit by preparing a sermon entitled "Tribute to Spinsters" for delivery at the Drexel Park Presbyterian Church.

"Why, some of the finest things in history have been done by women who never married," he said. Forthwith he proceeded to name "ten great old maids," as follows:

1. Florence Nightingale, the saint of modern nursing.

2. Clara Barton, founder of the Red Cross.

3. Jane Addams, noted social worker and founder of Hull House.

4. Frances Willard, founder of the Women's Christian Temperance Union.

5. Christabel Pankhurst, as organizer of the women's suffrage movement in England.

6. Susan B. Anthony, organizer of the woman's suffrage movement in the United States.

7. Sarah Bernhardt, great actress.

8. Mary Lyon, pioneer in the education of women in America and founder of Mount Holyoke College.

9. Queen Elizabeth of England.

10. Miriam, sister of Moses, who devoted her life to her family.

"Any woman can get married," said Mr. Cox. "But to-day many women don't get married simply because they don't want to. Business has given them independence."

He said there were three principal reasons why there are old maids:

1. Women forego marriage because of a duty to care for parents or younger brothers and sisters.

2. Women are disappointed in love.

3. Women want a career.

Indians Claim Rights

Say Native Baskets Should Be Duty Free Under "Jay Treaty"

The United States court of customs and patent appeals heard arguments on whether baskets made by Indians on the Canadian side of the St. Regis reservation in Quebec province should be admitted to the United States duty-free.

The Indians contend the baskets are duty-free under the so-called "Jay Treaty" of 1794 between the United States and Great Britain. The government claims they are subject to a 50 per cent. duty under the 1890 tariff act.

The controversy came before the court on the government's appeal from a decision of the U.S. customs court at Malone, N.Y., to the effect the baskets may be taken over the international boundary duty free. The Malone court held the Indians had this right under the "Jay Treaty" which dealt with international boundary and Indians rights.

Testimony filed with the court said basket-making is an ancient art of the St. Regis Indians, a remnant of the Iroquois tribe, once known as the Five Nations and later the Six Nations.

The suit was brought by Mrs. Annie Garrow, a member of the tribe living in Canada who had to pay duty on baskets she brought to the United States last December.

Choose Violet As Emblem

New Brunswick has joined other Canadian provinces having official floral emblems. The provincial government selected the purple violet as the official flower for this province.

Regulations to prevent exorbitant charges in legal money-lending in the United States have been in effect since the Civil War.

Compulsory Voting

Doubtful If Canada Could Adopt Law At Present

Would the people of Canada accept complacently a measure to enforce compulsory voting? If the members of the House of Commons knew the answer to that question they could probably decide whether or not to support such legislation. For years there has been considerable agitation throughout the Dominion for a law of this kind in order to bring out a larger vote. It has been argued that elections in Canada are unduly expensive because of the sparseness of the population and the extent of the territory concerned. A Federal election costs about \$5,000,000 when the printing of voters' lists, the salary of officials and the expenditures of the major political parties are added together.

It is only reasonable that, when such a costly effort is made to obtain the opinion of the voters as large a number as possible should exercise the privilege of the franchise. In Australia it is said that 95 per cent. of the people cast their ballots, compared with 50 per cent. before the system of compulsory voting was established. That is a remarkably high proportion of the population. Whether a law of this kind could be adopted in the Dominion is very doubtful. It has been discussed for many years without any definite results. In Australia those who fail to register are fined sixty cents, and ten dollars if they neglect to vote. The Dominion, because of its vast extent and varied climate, presents very great difficulties at certain seasons of the year in reaching the polls, particularly in the scattered rural sections where polling sub-divisions are few and widely scattered.

However, conditions are changing and it may be desirable to obtain a larger vote on the part of responsible citizens. The question of how to get a larger proportion of the people to go to the polls is undoubtedly worth consideration by a parliamentary committee.—Branford Expositor.

Canada Values Birds

Has Migratory Treaty With United States To Protect Them

Canada has probably 500 different kind of birds, and each different kind has a different travel schedule; in fact, some kinds scarcely travel at all and may be found even in the most severe winter weather in their accustomed haunts.

Canada values its bird travellers for the aesthetic pleasure they give by their presence, by their beauty of color, and by their charm of song. They are an important part of insect pests in forests and garden, and some kinds, which are grouped as game birds, are a major attraction for hunters in the fall. Not only are the game bird kinds used for sport, but they are also valuable to the residents in remote parts of Canada as providing an important part of their food supply.

To protect its bird travellers which spend part of the year in Canada and part of the year in the United States, Canada almost 20 years ago entered into a treaty with the United States which by co-operation between the two countries, extends protection to migratory birds by means of close seasons, bag limits, and the prohibition on unsportsmanlike methods. The birds do not belong to either country, they belong to both.

Canada's Migratory Bird Treaty of 1916 has been of major assistance in conserving this resource, and has been hailed the world round as the first international treaty for bird protection.—Canada's Weekly.

Diagnosed The Trouble

Veterinary Found Lump On Cow's Jaw Was Tennis Ball

A. J. Rattey, a farmer of West Dyalong, Australia, became concerned recently when a large lump appeared on the jaw of one of his cows and showed no signs of going down. Suspecting tetanus, he decided not to use the cow's milk. Finally he called in a veterinary surgeon to remove the lump. The veterinary discovered that the cow's complaint was a tennis ball which had become embedded between its teeth and its cheek.

Nobody Knows

The editor of the McGill Daily is disgusted because he doubts that there are 100 students in the University who could tell what is going on in Europe. If there are only half a hundred who know half of what is going on in Europe, the University should be proud of its rating, states the Toronto Globe and Mail.

The migration of birds is believed to have started in the latter part of the tertiary period, when the ice sheet came down from the north.

Avoid Spoiled Dough!

BAKE WITH ROYAL YEAST
It's always full strength

SPOILED AGAIN! I SHOULD HAVE USED ROYAL

Each cake of Royal Yeast is sealed in an airtight wrapper—safe from all contamination

YEAST plays an important part in making really appetizing bread. It must be full strength and absolutely pure, to avoid any "off-taste" in the finished loaf.

Royal Yeast is always dependable. Every cake is sealed in airtight wrappers—safe from impurities. It keeps its full leavening power. And Royal is the only dry yeast that has this special protection.

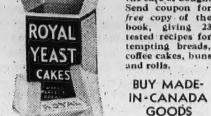

For 50 years, Royal has stood for highest quality. Today, 7 out of 8 Canadian housewives ask for Royal when they buy a dry yeast! They know it's reliable.

Don't risk baking failure with uncertain yeasts. Always ask for Royal.

Send for FREE booklet

To get uniform results in bread baking, it is important to keep the sponge at an even temperature.

The Royal Yeast Book gives instructions for the care of dough. Send coupon for free copy of the book, giving 25 tested recipes for tempting breads, coffee cakes, buns and rolls.

Trans-Canada Airmail

Will Give Fast Service Between Montreal and Vancouver

When the trans-Canada airmail service is inaugurated, mails will likely leave Montreal in the evening after the close of business and be delivered in Vancouver the next morning for afternoon delivery.

This was one bit of information Postmaster-General Elliott was able to give the House of Commons when questioned about air mail. He was unable to say, however, whether the service would start this year or upon what terms and conditions the mail would be carried.

Philadelphia bought its first fire-fighting apparatus from England in 1719.

Tiger cubs train their eyes and paws by playing with their mothers' tails.

STOP Scratching

RELIEVE ITCHING IN A Minute. Even the most stubborn itching of eczema, blotches, pimples, athlete's foot, rashes and other skin eruptions quickly yields to Dr. Ross' soothing, antipruritic, Itch-Stop, D. D. D. PRESCRIPTION. It soothes the irritated skin. Clears, greases and stimulates skin fast. Stops the most intense itching instantly. A few drops, at night, soothe, soothe, soothe. See how fast. Ask for D. D. D. PRESCRIPTION.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG
CHAPTER XVIII.—Continued

The doctor smiled on her benignly. He had noticed her new wedding ring when she had stripped the gloves from her slender fingers.

"I had hoped you would come back . . . I have often wondered since what happened to you. However, judging by that," he indicated her shining ring—"you evidently took what advice of mine you were able to get through your head. You've found your vital interest in life, it would appear; your saving interest."

Starr's head was in a whirl. She hardly dared to believe what her own ears heard, this wonderful story that was coming so casually from the lips of the man she had so long believed had condemned her. She leaned forward, eyes pleading, her body tensed. "You—you mean there's nothing the matter with me?" she asked through lips that quivered.

He smiled, and his shoulders shrugged carelessly. "Offhand, without any thorough examination, I would say that you are just about as normal as any young woman of your age. A little too thin, too pale, perhaps. Anaemic. Or it could be from worry. . . . He bent over his desk, looking her straight in the eyes, as capable fingers tapped on his desk in emphasis. "Young lady, I don't know much about Egyptian history, I know less of this particular superstition that has been playing hob with you. But I do know that the most potent factor of any superstition is the effect it has on the mind of its victim. When you believe a thing with all the strength that's in you, it's quite likely to come true. That's all there is to it, and in your case you were making it come true. Curse of Tut-Amen-Ra—bunk!"

Starr said, in a still small voice of one who was trying to reconcile a miracle. "But my father? John Lesang? They—"

"That man who died on the night the tomb was opened—Lessing, did you say his name was?—died of a tropical fever which must have been coming on for some time, and would no doubt have taken him anyway, cause or no cause. Your father was an elderly man, a scholar of sedentary habits who could not stand much strenuous outdoor life. Moreover he had delved into Egyptian lore so long that it was inevitable it would have its effect on him. Superstition and grief over the death of his friend preyed on his mind, until he became obsessed with the idea that he would be the next victim. He was the victim of his own terror. Something like that was happening to you, but you seem to have outgrown it to a great extent, if not entirely. Thank heaven for that!" He smiled again as she straightened up. "And see that you don't go on any more digging trips to Egypt. . . . Hmm, that country's as full of superstition this day as it was five thousand years ago. I've heard that they even believe in the prophecies of those sand diviners of theirs."

Starr smiled at him, her eyes reminiscent. "We saw one once," she told him. "My father did not believe him. 'I'll never forget what he told me afterward—'Love is the only true diviner.' You'll know that when the time comes." Her voice dropped to a whisper, but there was joy in it. "I think I've discovered he was right."

Dr. Morgan nodded emphatically. "He was right, my dear young lady. Quite right."

It took a long time for all that the doctor had said to Starr to sink into the dazed girl's brain. Then a sense of wild elation swept her like a magic flame. As the doctor explained it all to her, it seemed so simple, so natural. Yes, he was quite right about her, too. She had fled from his office like one possessed on that long-ago day, waiting to hear nothing more than: "You won't live another six months."

If only she had waited, and talked the matter over with him then! What pain and terror she would have been spared! But, on the other hand, if she had, the whole course of her life would have been different. She might never have met Michael!

She had worked out her own salvation, even though she had plumbed the depths of human suffering. She was free. Free to live, to love!

It was with that idea singing in her heart, a paeon of joy and gladness, that Starr, her cheeks tingling to a delicate flush, put another question to the doctor who had brought back life to her. He smiled again as he got up and went to the door. He opened it and said to the content

young woman in a nurse's uniform: "Please take Mrs. Fairbourne into the examination room, Miss Walker. I'll be with you presently."

It was a woman who felt as if she had been newly born into a world that was the epitome of joy and gladness who made her way through the busy city streets, headed for her own penthouse apartment. A woman with a golden glory racing through her veins. Her head was up proudly. Eyes and lips laughed their sheer joy into the face of the world that suddenly was a marvelously glad, happy place—all of it.

A miracle had happened. There might be those who would attempt to explain it away with prosaic words, but Starr Ellison Fairbourne knew that it was a miracle.

She was free! Free of the dread that for years had made life a nightmare. Free—and she was going to have a baby! Michael's child, and hers! She was going back to Michael.

It was all so joyous that not until she stood on the threshold of her home from which she had fled did she remember the circumstances of her leaving. She had only been thinking—how glad Michael would be to see her—how happy over the wonderful news she would bring him. Now she remembered. . . . Michael believed she had run away with Lance Marlowe. All during those days she had faced death alone in a somber New York rooming house he had believed that she was in Lance's arms.

Swift alarm cast a darkening shadow across her excitement. She should have made some arrangement to let him know the truth before he saw her. She should have written him of what she had really done, let him know of the curse of Tut-Amen-Ra and what it had so nearly done to her and to him. There was still to be explained those anonymous letters which had come. They were a greater mystery than ever, but somehow, they, too, could be explained, she felt sure.

The great problem racing her: How would Michael receive her? Would he and she ever be able to find understanding again?

Using her own key, Starr silently entered the penthouse apartment. And at the sight which met her eyes the very spirit seemed to leave her. Too late!

Michael was standing there in the centre of the long, low living room with Stephanie Dale. Both of his hands gripped Stephanie's shoulders; his eyes burned intently into hers. "He was saying in a strange voice: 'It was you all the time, Stephanie. How could I have been so blind?'"

His knees trembled weakly and the room blurred in odd dancing lights before her vision. She swayed, clutching at the tapestry curtain for support. Too late! Of course. It had been Stephanie all the time. His affair with Starr had been an emotional spree. A mad play-matrimony which could never last. And in the few days of her absence he had come to realize it. He wanted Stephanie!

Starr knew there was but one thing left for her to do now. She must go away again quickly—and silently. And then in that moment, just before the tapestry curtain dropped over her still white face, Michael saw her. He cried her name incredulously:

"Starr!"

In an instant all was confusion. Michael was at her side in two leaps. He picked her up and carried her inside the living room. His arms were holding her. He was kissing her on the lips and hair and eyes, starved kisses, as though he would never have enough.

Somehow, in the excitement, Stephanie had slipped away. Starr caught just one glimpse of her flitting through the entry way before the outer door banged on her. Starr and her husband were alone. And Michael was saying:

How to EASE a COLD

TWO SIMPLE RULES

Instead of buying costly medicines for a cold, try the way almost any doctor you ask will approve as the modern way—"ASPIRIN."

The way you use it is this: Two "Aspirin" tablets the moment you feel a cold coming on, taken with a full glass of water. Repeat, if necessary, according to directions in package. If throat is sore, gargle with three "Aspirin" tablets in ½ glass of water for almost instant relief. The "Aspirin" acts to fight fever, aches and pains of a cold and the cold itself. Relief comes quickly and you have wonderful comfort.

• "Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

TRADE-MARK REG.

"Stephanie has just confessed that she sent you those anonymous letters, darling. I made her come here to face me, to accuse her. I found one of them after you'd gone, and it wasn't hard, when I finally got down to thinking of it, to see Stephanie's fine Italian hand. . . . That came of a sudden, after I'd been trying to trace them for days. She wanted to break up our marriage, and she took a childish way of doing it, as children do those sort of things. She looked like something Egyptian. She thought they would cover her up; that nobody would ever suspect her. I recognized them as tracing from a ring she sometimes wears. . . . But, Starr, why did you run away? Nobody takes any notice of women's less than perfect letters."

Of course they don't, unless they have known the deadly fear under which Starr Ellison had so long lived! Stephanie never guessed at the coincidence, her letters raised. Oh, Starr was going to have so much to tell Michael, and how he would understand and pity her! How he would make it up to her! Much to tell, but a lifetime to tell it. Starr sighed happily.

Oh, the worry in Michael's dark, white face now, though! Worry over her, the wife he loved! His voice raved on:

"I caught Lance's boat before he sailed. He swore he hadn't seen you, and I believed him. I've searched everywhere for you, Starr, my own dear!"

Starr felt the sense of ineffable peace which only Michael's arms could bring, stealing through her whole body again. She was cuddled close against his breast. His lips brushed her hair.

She murmured: "There is such a lot to explain, Michael. I don't know where to begin."

Michael said: "Don't start just yet. I just want to hold you here, and make sure that you are mine, that you're real, and won't slip away from me again if I shut my eyes." Then he said what a moment before had been in her own mind. "We have a lifetime ahead of us for explanations, sweetheart!"

A lifetime ahead! The glory of it! Before Starr's eyes passed an imaginary parade. A parade of dream children, who now could be real. Sturdy little men with clear gray eyes like Michael's. Little girls like herself!

(The End)

Five Cents Worth

The doctor met Mrs. Brown in the street.

"And how is your husband sleeping, now, Mrs. Brown?" he asked.

"Did you give him the sleeping draught?"

"Yes, sir," he replied. "You told me to give him the amount I could get on a small nickel, but as I hadn't any silver I used five pennies and he's been fast asleep for five days."

The toughest part about learning in the school of experience is that it doesn't seem as if there is any recess. 2192

Coronation Broadcast

Not Merely The Empire, But The Whole World Will Listen In

Not merely the empire but the world will listen to the coronation ceremonies May 12 inside and outside Westminster Abbey. This, the first coronation to be broadcast, will reach out in English and foreign tongues from a battery of 50 microphones.

The earl marshal is considering the feasibility of setting up television machinery in the abbey for the actual crowning. In any event Sir Stephen Tallents, of the British Broadcasting commission, hopes and expects the outside processions will be caught on the wireless screen in their full panoply.

King George VI. will likely conclude the momentous day with a personal message to his subjects. This will probably be delivered at 8:00 p.m., G.M.T. (1 p.m., M.S.T.).

Twenty microphones will be established in the abbey itself so every audible detail of the service will be caught. Along the route microphones will be posted at strategic points and trained observers will describe the passing scene.

The coronation day broadcast will probably start about 10:15 a.m., G.M.T. (the procession times are estimated on the basis of precedent) when the procession begins from Buckingham palace to the abbey. And the abbey broadcast is likely to last from 11:15 a.m. until 2:15 p.m.

Immediately following the service there may be a break until the return procession begins at about 3 p.m., but this lapse is not definitely settled yet. The return procession will be covered with even greater thoroughness, the scenes at Trafalgar Square, St. James's palace and Oxford Circus to be given special attention.

The evening's schedule includes a program at 6:30 p.m. entitled "The Empire's Homage," which will link up as many parts of the empire as possible and which will be featured by individual messages of loyalty from each dominion and colony. This will conclude with a greeting from the United Kingdom spokesman, perhaps Prime Minister Baldwin. And then His Majesty will probably speak.

Sounds Like Fish Story

Superintendent of Aquarium Says Fish Snore When They Sleep

Fish do sleep, and some "snore." F. A. Potter, superintendent of Honolulu's tropic fish aquarium, is author of the first statement. He isn't certain about the snoring, but John Kia Nahaolelua, Hawaiian fisherman, will vouch for it.

"When we are torch fishing at night we sometimes can't see the fish, but we can hear him snoring," said Nahaolelua. "He sounds like a man. We follow the sound, and find the fish sleeping peacefully on the bottom of the sea."

Others who make their livelihood by spearing fish along coral reefs surrounding Hawaiian islands verify the noisiness of sleeping fish.

A tiny fish, that gained fame in popular song, definitely "goes to bed" at night, reports Potter. "Bed" may be a convenient cork on which the brilliantly colored little fish may lean, or under which it may find a sheltered spot. Trigger fish and hinalaeolo, a common inhabitant of island waters, often burrows deep into sand as night comes.

Big parrot fish have a peculiar custom, at least in their Honolulu aquarium tanks. They blow a "bubble" consisting of tenuous material remotely similar to a cobweb, and use it as a sleeping bag, Potter noted.

Some fish apparently never rest. Uluu and other game fish apparently are ready to gobble a meal at any time, and remain in almost constant motion.

Many are capable of making strange sounds, various authorities say. "Grunts" are common in the Atlantic, and gain their name from the croaking noises they emit when taken from the water. Trigger fish in Hawaii make "whooshing" sounds. Trumpet fish, according to one listener, have been heard "tooting" in thin strains, often like in quality. This same expert, writing in "The National Geographic Magazine," reported hearing the "whoop-whoop" of schools of sea drums darting beneath an anchored canoe on a quiet night.

The Oldest Photograph Believed to be the oldest photograph in the world, a Daguerrotype taken in 1837 is included in a photographic exposition which opened in Versailles, France. The picture shows the heads of several children.

The human eye, at a height of five feet from the ground, can see an object 2.5 miles away at sea or over a level plain.

BROKEN REST

Getting up night after night, breaking your rest, will damage your health. Burning, scalding, suppressed or too frequent passage warns of kidney and bladder trouble. It is dangerous to let those conditions go unchecked. Soothe and strengthen your kidneys and bladder with time-proved—

GIN PILLS
FOR THE KIDNEYS

Little Helps For This Week

The kingdom of God is within you. Luke 17:21.

Lord, take this heart that I would give
Forever to be all Thine own;
I to myself no more would live.
Come, Lord, be Thou my King alone.

The work assigned to the individual soul is to have life in itself, to make its own sphere, whatever it is, sufficient for a reign of God within itself, thankful if with the place and companionship given to us we are permitted to build an earthly home of grace and goodness, a home like a temple. But if this should be denied us then we may be able to build a home where God shall reign for ourselves at least, that we shall not break with our wills, and whether joyful or struggling with perplexity we shall know His will is law and submission will ever spring from communion of spirit and loving trust.

Need Building-Up?

WHEN you feel out-of-sorts, when you're no appetite, or stomach gives trouble, with gas or dyspepsia, or indigestion, try Dr. Pierce's Golden Medical Discovery. For coughs due to colds try this tonic. Read what Robert Warr, Jr., of 36 Water St., Cal., Ont., says: "Dr. Pierce's Golden Medical Discovery has proved itself to be the best. Hardships bring out the best there is in people, so it is fortunate there are enough hardships to go round.

To Alkalize Acid Indigestion Away Fast

People Everywhere Are Adopting This Remarkable "Phillips' Way"

The way to gain almost incredibly quick relief from stomach condition arising from overacidity, is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meals; or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid-headaches"—from over-indulgence in food or smoking—and nausea are relieved. You feel made over; forget you have a stomach. Try this Phillips' way if you have any acid stomach upsets. Get either the liquid "Phillips'" or the remarkable new Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM: Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

Legislative Mills Begin to Grind

C. H. STOUT
(Special Correspondent for the News)

Edmonton, March 2.—If Premier Aberhart's prosperity certificates had circulated with some of the speed and spontaneity that political rumors have been circulating since the legislative assembly members came into this capital city nearly a week ago, the velocity would have made the scrip dollars crackle round their circuits like a schooner's pennant in a 40-mile gale.

Probably because some anticipate that the session of the legislature now duly under way will bring to light some hidden treasure plan for a new economic order, and others confidently expect the social credit government to blow a fuse, people from many parts of the province have come in to watch the house in action.

No Plans Revealed

Government members in a two-day caucus did not clear the air, neither did they reveal any plans. While they were in the mood of debating what steps might be taken to overcome the adverse decision on the reduction of debts legislation constitutionally, another judge of the supreme court ruled that the government measure cutting bond interest rates in half also was ultra vires.

60-Day Moratorium

Emergency steps were taken by the government to meet a greatly feared rush to the courts for foreclosures on mortgages and loans suddenly left unprotected by the act passed last session to cut old debts and reduce interest to five per cent on loans obtained since 1932. An order-in-council placed in effect throughout the province a 60-day moratorium on mortgages, loans and private debts of various natures other than obligations for taxes, and license payments, etc., to municipalities and governments.

While this blanket moratorium enables the government to take time out, efforts will be made it is expected to draft new measures designed to control interest rates and provide for easier methods of debt payments than under existing laws. This, in view of the entire legal structure of the recent legislation being chucked into the court's waste paper basket, won't be an easy chore. Possibly the decision of the worthy supreme court jurist will be challenged in the higher courts in the meantime.

Offer Debt Reduction

Dominion and Alberta mortgage investors and loan association representatives came before the cabinet last week with an olive branch but Premier Aberhart didn't dicker according to reports. Briefly the mortgage loan men proposed concessions similar to the \$75,000,000 cut worked out in Saskatchewan between governments and lenders. They proposed that Alberta's drought areas be set apart in a special class and that within this region mortgage interest rates be cut to six per cent after January 1, 1937, and that all unpaid interest up to January 1, 1935, be cancelled. As far as possible a fresh start would be given borrowers and the next three years one-third crop payments would be taken on account of principal and interest, with no default ensuing if the crops were insufficient to meet amounts due. Agreements for sale would fall generally into the same category. For the remainder of the province farm mortgage interest rates would be cut to six per cent from the first of this year with special concessions to be arranged for payments where a borrower was distressed by crop failures. All such voluntary concessions, however, were to be contingent upon the government promising that no further debt reduction legislation be enacted, and those benefiting by the farmers' errors or arrangement act would be excluded.

New Bureau

Generally the speech from the throne read by administrator Chief Justice Harvey before a crowded assembly Friday afternoon was in no wise a bombshell of surprises. It made no direct reference to social credit and forecast no momentous policy of development. It referred to a coming marketing board, which is understood to be a set-up recommended as an import-export bureau in the much advertised 11-point program sponsored by John Hargreaves, British social creditor, now renounced by the premier and party caucus. The board probably would operate on credit payments by disposing of farm grain and other products in outside markets for currency and purchasing wholesale for necessary imported goods, while giving a percentage of Alberta credit to the producer for his commodities. The scheme is expected to be voluntary but legislation promised soon is understood to give drastic powers to

the board and minister in charge.

Road Program

Stress was laid in the speech from the throne and in the initial administration address of Dr. Robinson, Medicine Hat, on a 5-year plan of permanent road construction, but subsequently the minister of public works, W. A. Fallow, hinted that the big hard-surfacing program depended upon the introduction of social credit. He visualized asphalt highways from the U.S. border to Edmonton, then to Jasper, and another from Walsh to Banff, with turns, twists and railway crossings largely eliminated. What will be done about financing the project is yet to be revealed.

Coronation Trip

Premier Aberhart's intention to go to London for the coronation of King George and Queen Elizabeth has been announced and it's a no secret that the session will be rushed with all possible despatch to permit decks being cleared for the premier's getaway in April. The budget is expected down within a few days and it may be predicted with some assurance that the taxation news won't be particularly cheerful for our good bourgeois. Revenue didn't come up to expectations last year and ordinary income had to be used for some capital expenditure since outside borrowing channels are closed to the province. Corporations and financial interests are likely to take it on the well known chin when 1937-38 estimates are tabled and no easement in the general levy is probable. The speech from the throne indicated that the Dominion government will be asked for another \$15,000,000 loan to help tide over financial breakers, but the general viewpoint in this direction is not bright inasmuch as already \$25,000,000 is owed by the province to the Dominion. Taking it by and large private individuals hard pressed for coin of the realm need have no envy for the provincial government, for it needs money—no fooling.

Loyalty to King

Harmony reigned supreme in the legislature Thursday and Friday with all sides joining in a resolution of loyalty to King George VI, and in tribute to the last of the West's great battle kings, the late Senator Pat Burns. True, the movers of the resolution in reply to the throne speech dwelt lightly on economic bondage, financial shackles and general oppression of the people by the big interests, but no specific performance was promised for social credit. Just prices for farmers and basic dividends for covenanters were left untouched in all official references and among members it is easily discovered that dividends are to be buried without a funeral note if possible.

Defines M.L.A.

No review of the session to date would be quite complete without reference to J. L. Robinson's bot of the week, when the social creditor from Medicine Hat modernized the definition of M. L. A. This should mean "Men Like Aberhart" he declared with a burst of "Give us Men" poetry as a final peroration of the first address in the throne speech debate. A. V. Bourcier, government member for Lac Ste. Anne, not to be outdone pictured in a burst of eloquence how social credit could put all

idle men in Canada making roads in the Lac Ste. Anne constituency alone if the system was changed as it should be.

Opposition Critical

First gunfire to rattle across at the treasury trenches however came on Monday when J. J. Bowlen, Calgary, Liberal house leader, wanted to know why cabinet ministers of recognized worth and impartiality had been forced out, why no policy of oil development had been announced, why capital was being driven from the province by ill-considered legislation, why the government had used all their political resources to try and add the Liberal riding of Grouard to their already overflying administration forces, why agriculture was not being given proper consideration, why highways were being allowed to disintegrate and nothing was being done to put roads in shape for tourist traffic, why months were spent in drafting and preparing for enforcement of trade codes and then the project was abandoned, why no effort was being made to implement promises of dividends and just prices, why no state houses had been set up as provided in a hurry-up session, why experts on social credit had been renounced instead of consulted, why nothing had been done to aid the Dominion government in attempting rehabilitation of the dry areas, why nothing was being done toward weed control, what happened the scrip plan, why unemployment was increasing, why the premier had to make so many trips outside the province and why the session was called together so late in the season? Altogether it was quite a list of interrogations and likely to provoke some well turned retorts from government spokesmen.

As for all the rumors hereabouts one hears that the government will pay a \$5 dividend; that none will ever be paid; that the premier is going to resign; that he will stay to the finish; that the cabinet is breaking up; that no more changes will be made; that a scandal is likely to break over highway contracts; that all is pure within government public works affairs; that many backbenchers are hostile at domination by Messrs. Maynard, Unwin, et al, that the radical wing is in supreme command. Your guess is as good as mine.

Soup

Judge—"Why are you here?"
Motorist—"Driving too slow."
Judge—"Too slow!"
Motorist—"Yes, Your Honor, the speed cop caught me."

"That missionary who spoke to the ladies' aid afternoon said that in Bornea a wife can be bought for \$37," said a local lady to her husband last week. "Isn't it perfectly awful?"
"I don't know," he replied, "I suppose prices are higher there."

Proud Father—"Of course my son has studied foreign languages. Say 'Hello' to the man in Algebra, son."

Diner—"Waiter, how many calories are there in this soup?"
Waiter—"Ain't none, suh! Dis here's a clean place to eat."

Minutes of Monthly Meeting Kinsella Municipal District

Minutes of meeting held at Lake Vernon school house on February 20, 1937.

Full council present.
Cr. Lisson that the minutes be passed as read. cu

Cr. Zelinski that the statement of receipts and expenditures be passed as read. cu

Cr. Bowden that Mrs. Whitford be granted such relief as is considered necessary. cu
Cr. Albrecht that the application for relief of \$7.50 per month for A. Paul be approved, also M. Wilkinson. cu

Cr. Zelinski that the lease of gravel pit from the C. N. Rys for 1937 be continued, rental \$10.00 per annum. cu

Cr. Bowden that the secretary notify the Department that the municipality will require three carloads of seed oats, price 60c per bushel, certified and cleaned ready for the drill. cu

Cr. Bradley that Cr. Overbo look into the matter of relief for Mr. Wilkinson. cu

Cr. Zelinski that the following bills be passed for payment:

Dept. clothing Mrs. Whitford	\$8.53
clothing J. L. McPherson	8.89
S & Millar, legal	39.76

Cr. Lisson that the meeting adjourn. cu

—B. H. Green, Secy-treas, Municipal District of Kinsella No. 424, Lake Vernon school house, Feb. 20th, 1937.

Minutes of annual meeting held at Lake Vernon school house, Feb. 20th, 1937.

At 1 p.m. the returning officer called the meeting to order and asked for nominations for chairman.

Mr. Albrecht, seconded by Mr. Bowdway, that Mr. Comley be chairman. C.U.

The minutes of the previous annual

meeting were read and approved on the motion of Messrs. Burrows and Heron. C.U.

The financial statement was read and thoroughly discussed and was accepted on the motion of Messrs. Bowdway and H. Overbo. C.U.

The matter of the medical tax was discussed. Moved by Mr. Burrows, seconded by Mr. Severson that the meeting go on record as approving of the scheme as it is, and suggest to the Council that the same scheme be in effect in 1937 as was in effect in 1936. For, 34; Against, 2. Crd.

Mr. Burrows, seconded by Mr. Ness that no mileage be paid to the various doctors in connection with the doctor's tax. C.U.

A discussion re the weekly paper was held, and it was moved by O. Overbo, seconded by B. Bowdway that the Council continue the paper as before. C.U.

Mr. Bowdway, seconded by Mr. Burrows, that ratepayers have the choice of the three newspapers, namely, the Viking News, Irma Times, and Community Press. C.U.

Mr. Burrows, seconded by N. Ward, that Council be asked to purchase seed oats for resale to ratepayers, same to be cleaned ready for the drill. For, 25; against, 1. Crd.

At 3 p.m. the R.O. asked for nominations for Divs. 1 and 2, and also nominations for representative to the Viking hospital.

At 4 p.m. the R.O. announced that only one nomination had been received for Div. 1, namely Mr. R. S. Lisson, he therefore declared Mr. Lisson Councillor for Div. 1 for 3 years.

Three nominations being received for Div. 2, the R.O. announced that a Poll would be held in the B. Rodd house on Saturday, Feb. 27, 1937.

Only one nomination being received for hospital representative, Mr. B. Bowdway, he declared Mr. Bowdway representative for the ensuing two years.

The three nominations for Div. 2 were Messrs. Albrecht, Candy and Heron.

Mr. Albrecht then gave a short report of the Mun. Convention held in 1936. Mr. Bowdway, seconded by Mr. O. Overbo, that the report be accepted as given and that a vote of thanks be tendered to Mr. Albrecht. C.U.

Mr. Bowdway then gave a report of the Viking hospital. Moved by Mr. O. Overbo, seconded by Mr. Oakes, that the report be accepted as given and that a vote of thanks be tendered Mr. Bowdway. C.U.

Mr. Smith, seconded by Mr. Ness, that the ratepayers of M.D. 424 pass a resolution asking the Council to ward to Hon. Mr. Aberhart a petition asking the Govt. to enact such legislation as would be necessary to bring into force State medicine, such state medicine to cover all medical and surgical work and also hospitalization. C.U.

Messrs. Burrows and Smith moved that the Council be asked to go into the matter of reducing the arrears of municipal taxes, suggesting that some scheme be evolved to work off the said arrears. C.U.

Messrs. Heron and O. Overbo that a vote of thanks be tendered to the Council and the Secretary for the very able manner in which they have performed their duties in the year 1936. C.U.

Messrs. Smith and Heron that a vote of thanks be tendered to Mr. Comley for the efficient manner in which he carried out his duties as Returning Officer. C.U.

Messrs. Ness and Bowdway, that meeting adjourn. C.U.

B. H. GREEN, Secy-Treas.,
M. D. of Kinsella, No. 424.

G. W. SPINNEY
General Manager, Bank of Montreal.

The World of Wheat

By H. G. L. Strange, Director,
"Crop Testing Plan."

A new wheat variety REWARD has beaten Marquis for the Canadian Championship at Toronto, and the World Championship at Chicago!

In the winter of 1927 the cable dispatches of North America carried this news. Farmers, seed growers and scientific agriculturists were greatly interested. All wanted to know something about the new variety.

Reward wheat, it seemed, gave kernels that were unusually hard, exceedingly uniform and plump, of a beautiful dark red color, and high in weight per measured bushel. It attracted the eyes of the judges then, and has done so at every Grain Exhibition ever since.

Reward is the result of a cross between Marquis and Prelude, made by Dr. Charles Saunders in 1912, and selected, as was Garnet, by Dr. L.H. Newman, for test in 1923.

In addition to its magnificent appearance Reward is even better than Marquis in milling and baking value, and is from 5 to 7 days earlier than Marquis.

Here at last, it seemed, was the perfect wheat for the northern country. Alas! tests eventually revealed that Reward lacked in one character—most important to the farmer—its yield was definitely lower than that of Marquis, and so it has failed, unfortunately, to fill the place expected.

Following factors have tended to raise prices:—China purchases Argentine wheat—Some opinions that France faces considerable inflation—Too much rain falls in parts of India—France announces tariff rebate on imported Durum wheat.

Following factors have tended to lower prices: Normal crop virtually assured in principal Argentine corn area—French Cabinet issues decrees to curb any rises in prices—Quality of southern hemisphere wheat crops well above average—Beneficial precipitation in U.S. southwest—Argentine wheat offered for resale at prices lower than quoted by shippers—particularly from Argentine.

—Endurance, Decision, Precision and Presence of Mind.

The Murray bridge 8-oar team, which, in 1922, won the Australian championship in Sydney, consisted entirely of total abstainers.

Connie Mack, famous baseball manager, says "All the umpires in the world haven't put as many players out of the game as liquor."

"Hurry-Up!" Yost, the great football coach, says "Nothing tries a man's staying power like football and I will not waste my time trying to train a drinker."

Gordon D. Brown, one time manager of the Boston athletic association, says, "I know positively from experience in 15 Marathon races that alcohol is a positive detriment in a race of this kind."

In the South African war, Sir Fredrick Treves, speaking of the march to Lady Smith, said, "...the weather was hot... the first men to drop out were not the tall men or the short men, the fat ones or the lean, but the drinkers, and they dropped out as clearly as if they had been labelled 'alcohol'."

Sir H. M. Stanley, African explorer, Livingston Moffat, Bruce Gordon, and others who have been exposed to intense sun heat in that continent, say the highest per cent of death rate among those in that climate is invariably from the ranks of alcoholic drinkers.

Sir A. Newsholm, M.D.: "Alcohol makes the bed for consumption."

Dr. Lorenz, famous European surgeon, says, "A surgeon must not drink. It blunts the physical powers, such as firm muscles and steady nerves, which he must always keep on edge."

These Little Pigs Went to Market on Springs

FRICION SPRING

STOCK cars on the Canadian National Railways equipped with friction springs have reduced shrinkage and losses on live stock shipments, effecting a considerable saving both to the railway and the shipper, while at the same time providing the animals with greater comfort in transit and freedom from bruises and damage. Above is shown a shipment of bacon hogs, unloaded at the Montreal stockyards of the National System. Below, left, the friction spring which has reduced jarring and bumping of cars in transit. The way line at the top right shows the extent to which the car moves up and down on the friction springs; the way line below shows the movement which takes place in travel of a car not equipped with the friction springs. Test apparatus was used to determine the effect of the new spring equipment under actual loading conditions. Railway authorities also find the new spring equipment helpful to them since it reduces stress and damage to equipment and track.

Modernize your Home... or your Farm Buildings!

Check over this list

You give the orders—we can provide the money

When you have decided on what jobs you want to carry out either in your home or your farm buildings, come to the Bank of Montreal, which is co-operating with the Government in financing this work . . . our manager will be glad to talk over your plans with you with a view to arranging a loan for the purpose. Loans are repayable in easy monthly instalments.

A FEW SUGGESTIONS YOUR HOME

1. Foundation walls sound and in good condition?
2. Roof weather-tight and without leaks?
3. Exterior walls and trim in good repair?
4. Woodwork or masonry in good condition?
5. Have you all the room you need?
6. Bathroom facilities sufficient and modern?
7. Floors modern, attractive, and in good condition?
8. Interior walls and ceilings in good condition?
9. Woodwork painted?
10. Doors and windows weather-tight, easy to operate?
11. Walls and roof insulated against heat and cold?
12. Enough closet space? Built-in conveniences?
13. Chimneys drawing properly and

14. All stairways convenient, safe, well-lighted?
15. Gutters, down-spouts, and flashing in sound condition?
16. New driveway or walk?
17. A garage?

YOUR FARM

1. Do you need a new barn, hen house, pig pen, lambing pen, milk cellar, vegetable and fruit cellar, ice house?
2. If you already have all of these, are they in good repair? new roofing, enlarging, painting, etc., needed?
3. Silo in good condition . . . or do you need a new one?
4. Water supply efficient and convenient . . . do you need to put down well or erect windmill?
5. Have you a proper shelter for farm machinery? . . . Tool shed and workshop?

BANK OF MONTREAL

Established 1817

Wainwright Branch: C. W. McBRIDE, Manager

Irma (Sub-Agency): Open Tuesday and Friday

"a bank where small accounts are welcome"

IT IS THE DOLLARS

. . . that circulate among ourselves, in our own community, that in the end build our schools and churches, gravel our streets, lay our sidewalks, increase our farm values, attract more people to this district. Buying our merchandise in our local stores means keeping our dollars at home to work for all of us.

Work Must Be Found

Through jobs men and women are insured against privation and kept off relief. Jobs enable them to hold up their heads among their fellow-beings, to be self-supporting, to maintain homes, to educate and raise families.

With the exception of Alberta, the Dominion has made substantial progress in the past year in the matter of increased employment. In fact, 60,000 jobs have been made available to Canadians in 11 months, or thereabouts. On every hand—with the exception of Alberta—there is a definite upward swing in the employment pendulum.

What is our situation here? According to statistics issued for the week of December 12, 1936, Alberta had 2,694 more jobs than for the same week of 1935.

The fact is that the present policy of debt repudiation has not increased employment, but has increased unemployment. If our men and women are to be found jobs, as men and women are finding jobs in other provinces of the Dominion, the credit of Alberta must be restored.

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The eighth statement in this series will be published in two weeks)

fish is a **health food**

HEALTH . . . yes . . . because Canadian Fish and Shellfish are rich in proteins, vitamins, minerals and iodine. But health is not all. There is tastiness . . . the varied flavour of over sixty different kinds of fish foods. There is economy . . . the sound thrift of a food that gives you full value in healthful nourishment for every cent you spend.

Make "Any Day a Fish Day". Whether fresh water fish or sea-food . . . fresh, frozen, canned, smoked, pickled or dried . . . you can be confident of the prime quality and flavour that have made Canadian fish famous throughout the world.

DEPARTMENT OF FISHERIES
OTTAWA

Try This Appetizing Recipe

BAKED CREAM SALMON

1 1/2-lb. can Canadian salmon

1 pint milk

Salt and pepper

20-pc. butter

2 eggs. Beat

For the salmon from bones and separate into bits. Cook the flour and butter together without browning, and add one pint of milk, salt and pepper and enough grated onion to flavor delicately. Place a layer of sauce in a baking dish, then a layer of fish and so on, having sauce on top. Bake to a golden brown and serve very hot.

SARDINES LYONNAISE

Chop together cold boiled potatoes, one small onion, the contents of one tin of Canadian sardines (drained); fry with butter or best fat until browned and serve with parsley.

ANY DAY A FISH DAY

ary; 1 work shed; 1 pig pen; 3 galvanized barrels; 1 home-made ladder; tank and heater; 1 wooden cistern pump; 1 small heater; 1 pony; about 20 bu. barley, 40 bushels wheat, retained for seed.

National Trust Co. Ltd., Edmonton, Administrators of the estate of the late R. F. Kelcey.

The following will also be auctioned at the same sale:

1 mare, aged; 1 gelding, aged; 2 sets harness; Collars; wagon and box; bob sleigh, steel runners; disc; 4-horse eveners, iron; 3-horse eveners, iron—Percy Kelcey, owner.

1 set M. H. sleighs; 1 U.G.G. wagon box; 1 U.G.G. wagon, gear; 1 hay rack and gear; 1 single disc, 8 ft.; 1 M. H. double disc seeder; 1 M. H. binder, 8 ft.; 1 roller packer for gang plow; 1 gang plow, 14 in.; 1 M. H. mower; 1 buggy pole; 2 sets harness; 1 M. H. hay rake; 1 cockshutt break-

Another Boom Coming?

A warning against an impending boom must appeal somewhat in the category of an anomaly to Western Canadians at the moment, yet there are not lacking signs that what might ultimately prove a real disaster is in the making on the North American continent and more than one authority is predicting it and shaking an admonitory finger.

The attitude of admonition and warning is inspired by memories of the grand orgy of 1928 and 1929 and its reflex debacle when values were wiped out overnight followed by a protracted and painful passage through the valleys of depression.

Those who profess to see another boom in the offing, and some of them are eminent and authoritative economists and statisticians, are not fearful of an era of prosperity founded upon the properly co-ordinated functions of demand and supply, of the application of sound business principles to production and distribution of needed commodities, but what they fear, and possibly with reason, is a repetition of the wild and unfounded enthusiasm which led to a mad scramble to buy stocks at fictitious prices, to a boom in the prices of commodities beyond their real value and to an unparalleled orgy of speculation, all more or less based on the desire of the participants to reap where they had not sown and to "get something for nothing."

To this spirit which raged across the continent like an unbridled prairie fire must be attributed the boom which preceded the profound collapse of the autumn of 1929 and the severity and lengthy duration of the period of penitence and suffering which ensued.

The question which is agitating the minds of exponents of safe recovery based on sound business methods is whether or not the victims of the depression from which the people are only just now emerging have remembered and will heed the lessons which this season of trial should have taught them, or are they and their successors going to one more cast all discretion to the winds and again indulge in a riot of speculation and inflation leading to another depression which may be worse than ever?

Hoping for the best but fearing the worst, these authorities who are prophesying another boom and issuing stern warnings of the ultimate consequences should they fail to be realized, are basing their conclusions on the fact that large sums of accumulated money are seeking an outlet, that raw materials and finished products are required in enormous quantities to replace the ravages of decay and obsolescence of the depression era and the superabundant optimism and forgetfulness of human nature which is so apt to make desire the parent of decision, to paraphrase a well known legend.

One of the authorities who fears the imminence of a period of over-expansion, followed by a depression so severe as perhaps "to shake civilization" is Roger W. Babson, well-known business statistician. In articles on the subject he points out that the business pendulum in the United States has swung back to normal and outlines steps which the government of that country has taken in the hope of stemming the possibility of another business cataclysm, but questions whether the brakes will hold in the event of a runaway.

Mr. Babson appropriately points out that legislative and regulatory safeguards are of doubtful value if they run counter to the mob spirit and is pinning his hope to a spiritual revival as a safety valve and effective preventive. Undoubtedly he is right in his belief that such a revival would be far more effective than any man-made laws and control measures.

But no matter how neighbors across the line or residents of Eastern Canada might yield to the lure of an inflationary boom, no matter to what extent they may succumb to a temptation to "whooop it up" again, it appears incredible that citizens of Western Canada could so soon be induced to participate, let alone aid in promoting another speculative debacle. The wounds and sores left by the last one must be to too fresh and tender for that.

No, it must be assumed that Western Canadians will be content enough to feel their feet once again firmly on the ground without trying to soar on precarious wings to dangerous heights, at least for some considerable time to come.

Inverted Stomach

Rare Operation Is Performed In A Montreal Hospital

A middle-aged woman was on the way to recovery in a Montreal hospital after an operation for one of the rarest cases of "upside-down stomach" in medical history.

Doctors said the 51-year-old spinster, whose name was withheld, seemed to be progressing favorably toward normal physical condition following the 2½-hour operation that restored her stomach to its right position and corrected the position of her heart, which had been pushed far over to the right side of her body.

What made the case an extreme rarity, hospital authorities said, was the fact that the inverted stomach apparently developed in an otherwise normal adult. Babies are sometimes born with upside-down stomachs, but the medical men declared the occurrence of such a condition in a healthy adult was "most unusual." There have been only 12 examples known to medical science.

The surgeon in charge said the stomach certainly had turned over in the last eight years, and most likely within the last year. Last August, the patient suffered a fall, and it was believed an outgrowth of that.

New Field Crops Valuable

With an average yield of 9.1 bushels at an average price of 87 cents, the 7,360,000 acres of Alberta farm land sown to wheat last year produced 67,000,000 bushels with a total return of \$58,290,000. Comparative newcomers to Alberta's field crops, peas and beans topped everything in sight at an average of \$1.50 a bushel.

Mount Rainier's glacier system greatly exceeds that of any other peak in the United States. Twenty-eight rivers of ice creep down its sides throughout the year.

How To Overcome Piles And Rectal Soreness

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool is a nature's warning and proper treatment should be secured at once. For a sure cure from any drugist, a package of **Hammond's** is used as directed. This formula, which is used to internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. **Hammond's** is a physician's prescription and is highly recommended. It is easy to use and it seems the height of folly to try to risk an operation when a simple remedy, which is so pleasant to use, may be had at such a reasonable cost.

Ordered A Clean-Up

B.B.C. Starts Purge Following Flood Of Complaints

The British Broadcasting Corporation has ordered the greatest and internal "clean-up" in its history.

Broadcasting House has been inundated with complaints from listeners offended by certain items in recent programs. Hence the "purge." Captain Cecil Graves, Controller of Programs, is to survey every department in this campaign to "keep the air clean." A "black book" of forbidden items has already been started.

"Broadcasting has no official censor because it has never needed one," B.B.C. officials said. "We intend to maintain that reputation. Our responsibility lies in the fact that we take programs right to the domestic fireside where all members of the family are gathered."

Comedians' "lines" are to be submitted to the Light Entertainment Director four days before the broadcast, and two officials will scrutinize them. Plays which contain strong language are to be rigidly inspected. Even talks will not escape the "clean-up." Protests have also been registered against realistic studio "effects."

Where doubt exists as to the propriety of any item, it will be referred for final decision to the Department Director concerned.

Makes Transport Safer

If Flying Conditions Over Air Routes Are Well Known

Ordinary prudence, to say nothing of the human element involved, would seem to dictate the suspension of air service over certain routes until more is known of conditions that are likely to militate against safe transport, and until airmen are better qualified to combat them with a substantial expectation of success. Certainly the continued growth of fatalities is destined to create a very grave feeling of uneasiness among the public at a time when there is a general desire that they should grow more and more "air-minded."—Montreal Star.

The Pilgrim fathers made their memorable landing on the shores of America on a Friday.

Welding area burn at a temperature of 10,000 degrees, hotter than the sun.

Made Radio History

Madame Chiang Kai-Shek Broadcasts Address, In Faultless English

Madame Chiang Kai-Shek, China's "first lady," made radio history as the first Chinese woman to address a world-wide audience. She spoke in faultless English from her home in commemoration of the third anniversary of China's "new life" movement—a plan she launched with Generalissimo Chiang Kai-Shek, her husband and China's political leader for a moral re-awakening of the country.

China's "warlord era, with its attendant civil strife," she declared, "is nearing an end because public opinion opposes those who want to settle differences with the sword. National unity is here because the people demand it."

"For a decade Generalissimo Chiang Kai-Shek devoted himself to uniting scattered armed forces into a national army. Now he is seeking economic advancement."

She stated highways were the chief factor in the economic progress of China and said motor buses now were busy in every province.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your lower daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up, your stomach, you get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks pink. A liver bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes them good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of colon but have no calomel or mercury in them. **Carter's Little Liver Pills** are the name! Stubbornly resist anything else, 25c.

France's Declining Birth Rate

Population Has Been Increased By Advent Of Foreigners

The annual number of births in France reached its maximum toward the end of the Second Empire, when it was as high as 1,334,000 in 1868. In 1924 it had fallen to 677,000 and in 1935 to about 650,000, of which nearly 50,000 were the children of foreigners. The birth rate has therefore diminished by 384,000, or nearly a third, although the population has increased since 1868 by three million immigrants or naturalized persons, which has resulted in increasing the population from 38 to 48 million inhabitants. During the period 1900-35, the birth rate has decreased by nearly 100,000. The number of births per marriage had decreased even more rapidly. In 1860 the average number of births in France was 4.9 per marriage, at the end of last century it was 3, today only 2.2, or a diminution of about 50 per cent.—From Nature.

Self Preservation

Toronto Physician Says Average Man Does Not Take Proper Care Of His Health

While golf is the finest game for men between 35 and 50; badminton is unsafe for every man over 40, unless he has been an athlete all his life, Dr. C. O. Young told the members of the Optimist Club of Toronto at their weekly luncheon at the Royal York hotel.

Dr. Young said the average businessman to-day took far more care of his automobile than he did of himself.

"Too many of us," Dr. Young continued, "who come home after a heavy day at the office get into a heated bridge game, smoke too much, or perhaps take one drink too many, and the next day we start with a handicap. It is all due to a nervous tension."

In his opinion, Dr. Young added, poker was far more relaxation than bridge.

In Bolivia natives wear hats made from tree bark which is soaked in water and then beaten until pliable.

Small holes in linoleum can be patched with liquid glue and finely chipped cork.

QUICK RELIEF! INDIGESTION!

Constipation cleared up, too, after taking "Fruit-a-tives" short while.

Mrs. James Chalmers, of Falkenburg, Ontario, says: "I over 25 years I was troubled with indigestion brought on by eating too much rich food. I tried a thing without success gas pains and sore before Fruit-a-tives. After taking Fruit-a-tives a very little time I was able to eat and drink without unpleasant after-effects. My constipation cleared up quickly and I have never had it since. Fruit-a-tives, the prescription of a famous Canadian doctor, is made from extracts of fruits and herbs. They act to stimulate the liver and flow of bile, cleanse the elimination tract of waste and poisons and tend to purify the blood of harmful poisons and acids. On sale everywhere, 25c and 50c. Insist on Fruit-a-tives."

"BIG BEN GOES FURTHER BECAUSE EVERY CHEW LASTS LONGER!"

BIG BEN

THE PERFECT Chewing Tobacco

The Primary Producer

Chemist Believes Farmer Holds Solution To Surplus Problem

Motor fuel will provide the solution to Canada's problem of surplus agricultural products, Dr. J. Allan Harris, research chemist, at the University of British Columbia, believes. Motor fuel made from grain, potatoes, apples, pears, cherries and strawberries he placed in the key position. Next he predicted building materials, rayon and lacquer made from hay and straw. Artichokes and dahlias would produce sugar.

A blend of only 10 per cent. would account for 50,000,000 gallons of alcohol and remove 28,500,000 bushels of grain each year from the annual surplus, the professor said. In addition to the above mentioned alcohol can be distilled from any surplus agricultural product.

With a reference to dwindling exports the young scientist observed that "even if everybody stuffed themselves the collective stomachs of the world are not large enough to absorb all the farm products of to-day."

Scientists look upon the farmer as a primary producer, not only in the first commodity of life, food, but in the first phase of industry, raw materials, he said. With decreasing natural resource, they expect agriculture to produce the bases of practically everything.

SELECTED RECIPES

SPICE BREAD

Temperature: 350 degrees F. Time: 35 minutes. ¼ cup shortening; 1½ cups brown sugar; 2 cups Royal Household flour; 1 teaspoon baking soda; 2 teaspoons baking powder; 1 teaspoon salt; 2 teaspoons cinnamon; 1 teaspoon nutmeg; ¼ cup sour milk; ¼ cup chopped walnuts; 1½ cups raisins; 2 eggs.

Cream the shortening and gradually add the brown sugar which has been sifted. Stir together five or six times the flour, soda, baking powder, salt, cinnamon and nutmeg. Add finely chopped nuts and raisins which have been dredged with flour. Bake 35 minutes in a moderate oven in a pan 9"x12" which has been lined with waxed paper. Ice with caramel icing. No. 1

CARAMEL ICING No. 1

1 cup brown sugar; 1 tablespoon butter; ¼ cup cream; 1 tablespoon coffee; icing sugar. Mix together the brown sugar, butter and cream in a frying pan. Stir until sugar is dissolved and bring to rapid boil. Boil two minutes exactly from the time the whole mixture breaks into a boil. Remove from heat and add 1 tablespoon strong coffee. Beat in sifted icing sugar until mixture will spread easily. Recipe by Mildred Mae MacKenzie Copyright.

JELLIED SANDWICH SALAD

1 cup boiling water
1 Lemon jelly powder
¼ cup Crown Brand Corn Syrup
½ cup mild vinegar
1 teaspoon salt
1 teaspoon pepper
2 tablespoons chopped pimiento
1 cup chopped cabbage
1 cup chopped celery
½ cup peas
2 cups shrimps, or chopped cooked ham.

Method: Pour boiling water over jelly powder and stir until dissolved; Add Crown Brand Corn Syrup, vinegar, salt and pepper. Let stand until partially set; add vegetables and mix well. Pour one-half mixture into a loaf pan; add filling of shrimps or ham. Cover with remaining half of vegetable mixture. Let stand until firm; unmold on a bed of lettuce and serve with Mazola dressing.

Mrs. Lucy Dudman, who has just completed 50 years as caretaker at St. Peter's church, Wilshire, England, has during that time also been clerk, bellringer, vergier, stoker and response leader at funerals.

Fine, delicate furniture should not be kept near windows, radiators, or any place where sudden changes in humidity and temperature occur.

Study Evolution Theory

Scientists To Make Home With Apes In Jungles Of Siam

In hopes of catching a glimpse of man in the making, seven American scientists will make their home for the next nine months with the anthropoid apes in the jungles of Siam, Borneo and Sumatra to make close observations of the life, habits and behavior of the subhuman species in their natural environment, it is announced by Harvard University. The expedition, which aims to fill in some of the important gaps in the jigsaw of human evolution, will include learned scientists.

The scientists believe that by observing man's immediate ancestors as they live in groups in their native habitats they may obtain living evidence of man in the process of evolution at a stage millions of years before he finally emerged. It is hoped to find missing links in both the physical and cultural aspects of man's slow evolution from ape to man-ape, ape-man and finally man.

Film British Fleet

Manoeuvres Of The British Home And Mediterranean Fleets To Be Shown

For the first time manoeuvres of the British home and Mediterranean fleets are to be made the subject of a film which, it is understood, will eventually be released to the public. The film will be essentially "documentary" in character, but will have a theme. This will concern the adventures of two boys who join the navy, from the moment they put on their uniforms until they find themselves under active service conditions, as shown in the manoeuvres. The producer is Commander J. L. F. Hunt. He was the captain of the submarine in "Mer-Like These" and directed "White Ensign."

There are to be four cameras with the "Red" fleet and four with the "Blue" during the manoeuvres. The house of Rothschild was the first money-lending organization to operate on an extensive scale. Founded in Frankfurt-on-the-Main, it had subsequent branches in Vienna, Paris, London, and Naples.

Empire Defence

Says Each Dominion Should Realize Its Own Responsibilities

Each Dominion should realize "its own Imperial responsibilities, and the defence of an Empire scattered over the world should not devolve upon a small island, Leopold Amery, former Dominions Secretary, declared in a speech supporting the Government's defence program.

He said he refused to subscribe to the belief that, in a general war and declared it was a great mistake to regard the defence measures as directed against Germany. "When everyone else is putting their treasures into iron vessels can we afford continually to keep ours in brittle, earthenware jars?" he asked.

Still Wants His Well

Farmer J. Berg, of Dolland, Saskatchewan, started to dig a well but found he had a coal mine instead on his farm near there, 175 miles southwest of Regina. The seam is three feet wide and of unknown depth. But Berg is still looking for water.

The British Museum of London is said to have the world's largest collection of coins and medals. There are more than 500,000 pieces in the collection, the oldest having been made about 700 B.C.

The mule deer is the largest found in the United States.

ANOTHER EMPIRE FLYING BOAT READY FOR SERVICE

Created By Peace Lovers

Horrible War Weapons Just Outgrowth Of Industrial Progress

Who invented gunpowder? Barthold Schwartz, a monk, if history reports aright. Who invented the submarine? No bloodthirsty naval officer, but harmless Bushnell, artistic Robert Fulton and gentle Holland. Who gave us the machine-gun? Gatling, a physician, and Maxim, a Maine farmer. High explosives, case-hardened armor, tanks, lethal gases—all came from the ranks of civilians. The fire-breathing, saber-rattling soldier adopts such innovations reluctantly. When at last he concedes the superiority of new weapons, the contemplation of which fills him at first with gentlemanly disapproval, he resigns himself to the task of making them practical. On the whole he is an academic, a developer of outside inventions rather than an originator himself.

The truth is, however, that our means of destruction have been the natural outgrowth of industrial progress. When the metallurgist develops the process of cementation, the armor-maker is bound to apply it. Given what is called the "caterpillar" principle of locomotion used in tractors, and the tank springs forth naturally. Since miners need high explosives, the industrial chemist will do his best to provide them, whereupon the army and navy step in and appropriate them. When wireless is invented, the old semaphore are relegated to positions of minor importance on warships. And when the airplane at last reaches the practical stage, general staffs take notice and begin to think of reconnoitering from on high and bomb-dropping.

Modern warfare owes its terrifying modern character to so many sciences that it is difficult to conceive how Governments can ever hope to conduct research in all and thus control the technical developments that give us new metals, new means of communication, new gases and explosives. So the chances are that the peace-loving civilian will continue to devise the major "improvements" that seem destined to make war more horrible than it ever was.—New York Times.

Smut In Wheat

Discovery Of Treatment Resulted From Marine Disaster

The discovery of seed treatment for the control of smut originated in a marine disaster. Towards the end of the seventeenth century a wheat-laden vessel was wrecked on the west coast of England near Bristol. Farmers of the vicinity salvaged some of the grain which, being found unsuitable for grinding into flour, was used as seed. One observant farmer observed that the wheat grown from the brine-soaked salvaged seed was freer from smut than was the crop produced from home-grown seed.

Writers of the eighteenth century refer to the practice of bringing seed grain and to the influence of sea water in reducing the incidence of smut. But, says the Farm News Letter of the C-I-L, it was no longer necessary to wreck a ship in order to procure the treated seed, any more than it was to burn down pigsties for the gratification of appetite on roast pork, which was done in ancient China. Following Bowyer's discovery of the "delicacy" if one is to believe "The Essays of Elia" by Charles Lamb, in his "Dissertation Upon Roast Pig." This was another epoch-making accidental discovery that led eventually to the invention of the gridiron.

Played Dead

Spanish Insurgent Sympathizer Hides In Malaga Cemetery For Two Months

The newspaper Seculo told how Alvaro Esteve, a Spanish manufacturer with insurgent sympathies, played dead in Malaga cemetery for two whole months.

Senor Esteve hid in an empty coffin in the family tomb to escape government troops during government domination of the seaport. He emerged when the insurgents took the town.

Each night, he said, he heard the screams of persons being executed in the graveyard. He subsisted on food which his sister concealed in wreaths which they laid each day upon graves.

His hair, jet black two months ago, turned a snowy white.

Appear In Many Forms

Rainbows appear in a multitude of forms. They vary in width, and in number and order of colors. A sheet of water, as well as a sun which is reflected by such a sun, may give us a primary and secondary reflected rainbow in the sky, intersecting the real rainbow.

Clothes Moth Pest

Methods Used For Controlling These Destructive Pests

A reminder that clothes moths are found in greatest numbers in the spring and summer is made by the timely re-issue of the Dominion Department of Agriculture circular on the methods of controlling these destructive pests. Clothes moths cause enormous damage annually in Canada to materials such as woollens, furs, hair, and feathers, upholstered furniture, carpets and many other things. The damage is caused by the feeding activities of the larvae, or caterpillars, of the moths, not by the winged moths themselves whose principal function in life is to mate and deposit the eggs from which the larvae develop.

The prevention of damage requires the exercise of care, forethought, and vigilance. Articles of clothing and other materials subject to attack should not be left undisturbed for long periods, particularly during the summer months, in such places as cupboards, attics, and trunks unless adequate precautions have been taken to protect the articles from injury by moths. The clothing and other articles, after being thoroughly brushed, preferably in strong sunlight, should be placed in well-made trunks or chests with tightly fitting lids, or enclosed in cotton or paper bags, or in cardboard boxes sealed with paper strips. Enclosing clothing in two thicknesses of strong wrapping paper, or several thicknesses of newspaper, taking care that the edges are so turned that no moths may gain entrance, is also recommended as an alternative measure of precaution.

When carpets or rugs are suspected of being infested with moth larvae, the carpets should be thoroughly cleaned on both sides with a vacuum cleaner. Vacuum cleaners may also be used for removing the lint from floor cracks, behind baseboards, and air shafts of central heating equipment where infestation frequently occurs. For information as to methods of control and habits of clothes moths is given in the circular which may be obtained free on application to the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

History Of Duelling

Duels Fought In England As Late As 1844

Duelling was unknown in Greece and Rome. It originated in Germany some 1,800 years ago when trials were settled by combat between the two parties.

German duels, forbidden by the republic in 1818, were revived by the Nazis in 1933. The Saxon invaders of England brought trial by combat with them. The duel, however, outlived this origin and was a recognized method of settling quarrels down to the middle of Queen Victoria's reign.

Between 1760 and 1820 there were 172 duels in England, 91 were fatal. Yet only two duellists were condemned to death for murder.

But in 1844, after Captain Munroe had shot Colonel Fawcett dead, Queen Victoria personally intervened to stop the practice.

The most famous of English duels took place between Lords Mohun and Hamilton in Leicester Square, London, in 1741.

Both combatants died from their wounds the same day. But the oddest duel ever fought was between two Frenchmen who were in love with the same opera singer.

One morning in 1808 they took off in balloons from the Tuilleries Gardens, each armed with a blunderbuss to pierce the envelope of his rival's balloon.

When they were half a mile up both discharged their pieces. One of the balloons burst and its occupants were dashed to bits—the other sailed safely away.

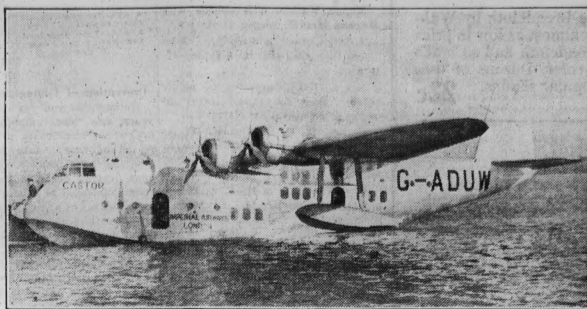

That is the first record of a fight in the air.

Omitted From Program

A 32-page Coronation Day program has already been printed and issued for a restricted circulation. The handsome volume contains pictures and biographical matter of the Royal Family, but no reference is made of Edward, now living in Austria. The Duke of Windsor is the only member of the Royal Family not mentioned.

Whales can dive a mile below the surface and rise immediately, without harm. A chemical adjustment of their blood cures for the variation in pressure.

The Riksbank, or Bank of Sweden, is the oldest bank in Europe. It was founded in 1656, and was the first bank in the world to issue paper money.

Taken a few moments before the huge plane left the water, this picture shows the "Castor" about to leave Southampton Water en route to distant parts of the British Empire. This flight is over the "All-Air" route which is now possible through the flying boats which can travel over vast areas of ocean without having much worry if forced to land on the water.

Must Accept Responsibility

Driver Should Regard Car As Possible Instrument Of Death

Whenever someone shoots someone else with a revolver, everyone says "Dear me, revolvers are very dangerous things and shouldn't be allowed; we thought you had to register them or something. Hang the brute!" But when someone, either by reason of hard liquor, stupidity or recklessness, piles up a car and provides three or four jobs for the undertaker, nearly everyone says "My, my, what a sad accident. And the driver was killed, poor fellow!"

The point being that while revolvers and automatic pistols are fairly well controlled, automobiles and trucks are not as yet regarded by the law as possible instruments of death, not sufficiently, at least.

Most any half-baked youth, or short-sighted individual, or nervous person, or even a person subject to heart attacks can obtain a driver's license. The examination is perfunctory and the attitude seems to be "you can drive it, and heaven help you if you hurt anybody."

Until the public is made to realize that there is almost as much responsibility in driving a car or truck as there is in driving a locomotive, and that equal safeguards should be applied the traffic toll will continue.—Kirkland Northern News.

For Protecting Wild Duck

Organization Has Been Formed By Group In United States

A group of waterfowl hunters in the United States has organized for the purpose of protecting the wild duck. The program calls for raising a large sum of money annually and attention will be given, among other things, to the breeding grounds in Northern Canada.

Of major importance, too, is the slaughter carried on in the South Central States where the ducks are much more in contact with civilization than during the summer stay in Canada.—Port Arthur News-Chronicle.

Admiral Lawrence of Arabia scattered on his newly-erected tombstone in England dust which they had brought from Damascus, Syria, one of the last places to fall before his Arab army.

"Do you serve crabs here?" Walter: "Yes, sir. We serve anybody. What can I do for you?"

Tip For Public Speaker

Leaving Listeners Sorry He Stopped Is Good Policy

A race horse's reputation depends on how little time he takes in going around a mile track. A golfer's reputation depends on how few strokes he can use in making the 18 holes of the course. A speaker's reputation should depend on how few words he can use and still impress his ideas on the minds of his audience.

No speaker ever failed to leave his audience sorry. They are either sorry that he sat down when he did, or sorry that he didn't sit down when he didn't. There is no such thing as a speech exactly the right length. There is no perfect stopping place because the audience is never exactly satisfied. It either hasn't had enough, or else it has had too much.

Between the two extremes, it would seem that every speaker would err on the safe side and make certain his speech would be on the short side instead of the long. Sad to relate, however, there are a dozen speeches too long to one that is too short.

One cannot help but recall Irvin Cobb's story of the public hanging at which a fat negro mammy stood perspiring in the sun for more than an hour while the condemned man went on with his final speech. Exasperated at last, she called out: "Git hung, Nigger! Git hung!" Most of the things a speaker says after the first fifteen minutes are of great interest to no one but himself.—Kiwans Magazine.

London Police Are Alert

Watching Private Agencies Selling Seats For Coronation

Average price for a front seat for the coronation is about \$125, others less prominent \$65. Orders have been heavy, reportedly twice as heavy as for the jubilee ceremonies in 1935, and Americans and a few Canadians are said to have paid as high as \$250 for a single seat. London police are watching private agencies closely for recurrence of incidents at the diamond jubilee procession in 1897. In that year 20 companies were formed in a fortnight for providing seats. One agent made a haul by selling seats in someone's else's window 10 times over at \$500 a time. Then he skipped back to America before the procession.

A day's fog costs England \$30,000,000.

A Lincoln Story

How Famous U.S. President Won A Convert To His Cause

While Abe Lincoln was on his way to Washington to be inaugurated in 1861, his train stopped for a short time in Wellsville, Ohio.

A large crowd gathered and the homespun lawyer was making a speech from the rear platform when an inebriate in the crowd blurted, "I voted for a damn sight better man than you."

A man who had been used to many jibes, Lincoln did not let his pulse become upset and instead responded with, "I want to meet that man; bring him to me."

Although intoxicated, the man had sense enough to be frightened, while the crowd became tense with anticipation of the meeting. In a few minutes the man was face to face with the president-elect.

Lincoln, still poised, looked at him a moment and then said, "My friend, you did not vote for me but I have been elected. I am your President. I am going down to Washington to tackle a very hard job and I need your help. Will you help me?" This overwhelmed the inebriate, and he replied, "Sure I will, Mr. Lincoln, sure I will."

All this overwhelmed the crowd, too, and every one cheered.—Cleveland Plain Dealer.

Shrinkage Of Stored Grain

Average Loss Is Very Little According To Tests

Wheat and oats stored in bins in good condition and kept free from rodents shrunk very little in storage according to tests made by the Ohio Experiment Station. Over a five-year period, the average loss from shrinkage in wheat was seven-tenths of one per cent. Average shrinkage with oats was less than two-tenths of one per cent.

The moisture content of the grain varied slightly from month to month, depending on the condition of the weather, yet, at the end of the year, the moisture content had changed very little.

A magistrate has warned a defendant that wives are not furniture. That is so. For one thing the installment people will take furniture back.

It would take thirty billion billion billion electrons to make 'an ounce, according to estimates.

The Stone Of Destiny

Removal To England Has Always Rankled The Scotch People

Scotmen are indebted to an Anglican clergyman—to wit, the Dean of Westminster—for the news that some time ago a plot was discovered to steal the Stone of Destiny. The police got wind of the conspiracy and nothing came of it, but it makes a nice "little thriller." Of course when Edward I originally stole the stone, and took it to London, there were no police in Scotland to stop him, and probably though there had been he would have taken his own way. But his depredation has rankled more bitterly with some sections of the Scottish people than any other unfriendly act performed by England. To steal the ancient stone, however, would have been a thoroughly illogical act, assuming that the intending perpetrators were perversely Scots Nationalists. So long as the Stone of Destiny is in London Scotland can claim to supply the basis of monarchy, for the British Kings are crowned over the Stone. Were the Stone spirited away, on the other hand, Scotland would be so much the less represented at the Coronations. The conspiracy, indeed, seems to have been as silly and pointless as that which some weeks ago resulted in the removal of the sword traditionally associated with William Wallace from the memorial at Stirling. From plots like these old Scotland's grandeur emphatically does not spring, and the ingenuity and resource expended in them could be more aptly applied otherwise for the good of their country.—Aberdeen Journal.

Stunted Emotions

We Are Informed That This Is At The Bottom Of Labor Troubles

People who specialize in knowing all about emotions—members of the American Orthopsychiatric Association—were told that stunted emotions are at the bottom of labor troubles.

"Most of us," said John Levy, M.D., of New York, "are only 25 per cent. efficient, emotionally. We get only 35 per cent. of the fun we should have."

We are equally bad in love or play, he explained, but somewhat worse in business. The result is a big waste in business efficiency due to loss of emotional and personality satisfactions.

"The fact," he said, "that business and industrial relationships can satisfy as big a craving for emotional satisfactions as a home, a wife or children has never been recognized."

"One must think that a husband or father who spends most of his time bossing around his employees, who would rather go to his business on Sundays and holidays than spend his time with his family, understands, at least intuitively, the tremendous emotional ties that bind him to the office."

"But it is as difficult for him to see his own status as 'stern father' in his strict dealings with his striking employees as it is for the employees to see their protesting behavior as a resentment against an authoritative parent."

"Without some recognition and understanding of the role one plays in human relationships, the development of techniques for controlling them is impossible."

"Millions of dollars are spent by the automotive industry to keep its bookkeeping up to date, but hardly a penny to understand and modernize the human machinery upon which all other aspects of its operations depend for success."

Canadian Architecture

Could Be Likened To Pea Soup Opinion Of Halifax Man

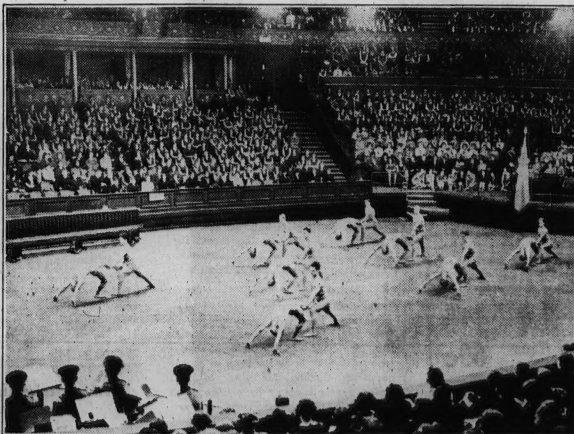

If French architecture recalls champagne, and England's Georgian style suggests roast beef, and southern colonial reminds the observer of mint juleps, then Canadian architecture is like pea soup. This observation was delivered by C. A. Fowler, Halifax architect, in an address at a convention of building men. His parallel, he said, was drawn in the belief Canadian architecture's ingredients were quite as obscure as those of pea soup.

Has Earned Rest

One of the new arrivals at Scotland's rest farm for horses is Monarch, a pet pony which worked underground in a Northumberland coal mine for 20 years. During all that time Monarch never saw the light of day or felt grass under his feet, for never once was he brought to the surface.

Due to the great care used in re-lubricating and treating it, petroleum oil for lubricating watches costs hundreds of dollars a barrel.

HEALTH AND FITNESS CRAZE SWEEPS EUROPE

This picture, taken at the Royal Albert Hall, London, during a health and fitness demonstration, is a good indication of the interest which has been aroused in the Mother Country and Europe in helping to make the people more physically fit. The demonstrators in the picture are members of the Danish Team, made up of farmers, who gave up their farm work for a week to travel to England to put on these displays.

Wabasso Broadcloth

Special quality poplin weave Broadcloth by Wabasso, this good heavy cloth is almost as low in price as the cheapest so-called broadcloth and so much better in both quality and color. Dozens of uses for it in every home. 16 popular shades. 22c Per yard

ALBERTA

Main Street

Mr. G. Watkinson is visiting with Mr. and Mrs. H. Sorgen at Holden.

A large crowd attended the John Deere Plow Co's show last Friday afternoon.

Mr. L. Good, inspector of public schools, made his annual inspection of the Irma school on March 3rd.

Messrs. R. D. Smallwood, W. A. Burton and Chas. Wilbraham are in Edmonton this week on municipal business.

Mrs. Weir, aunt of Mr. E. L. Elford and sister of the late Mrs. Lindsay, is seriously ill at the home of Mr. and Mrs. Elford.

Mr. James Donoghue of this district reports that his turkeys started laying on February 28, a month earlier than usual. Looks like an early spring, eh?

Early Wednesday morning, Mrs. S. W. Lindsay, grandmother of Mr. E. L. Elford, passed away at the Elford home, where she has resided for a number of years.

A general meeting of the Irma branch of the Canadian Legion and the Ladies' Auxiliary will be held in Hedley's hall on Saturday evening, March 20th. All members are requested to attend.

Mrs. E. W. Carter is attending the sessions of the Alberta conference branch of the W.M.S. as the delegate from Irma. These meetings, from Tuesday until Friday, are being held in Calgary this year.

Mr. J. H. Elliott celebrated his 89th birthday on March 1st and received birthday greetings from a large number of relatives and friends. Although Mr. Elliott's eyesight has failed considerably, he is still active for his age, walking down town almost every day.

The regular meeting of the Ladies' Aid of Irma will be held on Thursday, March 11th, at 2:30 o'clock at the home of Mrs. A. H. Locke. An article on "Easter" will be presented by Mrs. I. S. Reeds. Devotional period, Mrs. Darling. Hostesses, Mrs. Reeds and Mrs. Arnold. Visitors welcome.

—M. Marsden, sec'y.

The regular meeting of the Irma social credit study group was held March 1, 1937, in the public school. After the business part of the meeting there was a short program sponsored by the following artists: Tap dance, Jean Elford; solo with guitar accompaniment, Howard Riddle; a duet by William Milburn and Mr. Congdon J. The meeting closed with the national anthem. Lunch was served by members of the group. The next meeting will be held April 5th.

SPORTS

Eddie Wenstob appears to be under good management. His success has been phenomenal. Yet it seems unwise to place a man of his weight against heavier opponents. Eddie is a Light Heavyweight, and should not rightly be a target for the punches of those in the Heavyweight class. To step out of his class places an awful handicap upon him.

It may have been just press-agent stuff that Eddie will now fight Bob Pastor, the fellow that toyed with Joe Louis on their first encounter. If such a bout had actually been signed, it looks foolish. Wenstob has been doing so well we would hate to see a mess made by pitting him with Pastor.

The horserace at Santa Anita on Saturday must have been a thriller. The huge purse of over \$50,000 to the winning horse, was a pretty stake. The trainer got \$10,000 and the jockey over \$9,000. An Edmonton jockey, Jack Pollard, rode the horse that came in second, so close that a camera was needed to record just who won. Several Canadian horses also ran.

At this race some 50,000 people packed the grounds, and during the day made wagers through the betting machinery of over \$1,000,000. One laughs the person who tries to get rich betting on a horserace. The thrill of the thing is the secret for the wager. Even to lose produces a thrill, though not a very pleasing one.

Our Alberta curlers started the contest in Toronto by copying the first win. All the prairie rinks did that also. Our brand of curling appears to be a little better than in other parts of Canada, for nine of the eleven yearly contests have been won by prairie rinks. Our long steady winters produce good curling conditions, with consequent skillful curlers.

The Canadian team, the Kimberly Dynamiters, came out tops in the hockey series against all Europe. But

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Prevention of Contagious Diseases
Mothers, do you realize that fifty years ago 'black' diphtheria wiped out whole families in a very short period of time? Like a plague it swept through many towns and villages, leaving death in its trail, and very little could be done about it. Today most towns and cities are practically free from diphtheria. This dramatic change in the picture is largely due to the development of diphtheria toxoid, which prevents the disease in children and adults. The giving of the diphtheria toxoid produces no discomfort.

Another disease which in the past has caused disfigurement and death is smallpox. Today it is practically unheard of in this country. This state of affairs again is due to the widespread use of vaccination against the disease. Diphtheria toxoid and vaccination against smallpox have prevented two of the worst plagues of mankind and all parents should have their children protected against these diseases.

There are other contagious diseases which although not absolutely preventable like diphtheria and smallpox, can be modified and in some cases prevented by early recognition and treatment. The most serious diseases of the latter group are scarlet fever, measles and whooping cough. Contrary to the generally accepted idea that all children develop these diseases and recover from them, is the fact that death occurs from all three in certain infants and young children. Pneumonia following measles and whooping cough is often a cause of death. Remember, mothers, your infant or young child may be one of the less fortunate and develop measles and whooping cough, which may cause life-long disease or death. Never allow your child to be exposed to contagious diseases with the excuse that he will get them sometime anyway.

The family physician should always be consulted when any suspicion is

aroused that a contagious disease has attacked your child. The physician will be able either to prevent these diseases or modify their severity by early treatment.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

ANCIENT CUSTOM LINGERS ON

Early Church Started Fish Habit that Persists to this Day.

Fishermen from the Atlantic to the Pacific are hopeful that the present effort of the Canadian Government to promote the consumption of Canadian fish will result in the people eating more fish throughout the week rather than confining this delicacy to Fridays.

Though fish has been eaten as a food since prehistoric times, the early Christian Church decreed that no meat should be eaten on Fridays and fast days but that fish might be substituted. From that arose a practice that has persisted down to the present time and has led people of every denomination to associate fish with Friday often to the virtual exclusion of other days.

According to leading executives of the fishing industry, this habit is not only harmful to the industry but is robbing people of many advantages. If the people eat more fish throughout the week, they would be assured of fresher fish and they get it at lower prices. The increased demand for the products of the sea, lake and river would give an impetus to the whole industry and, while retail prices to the public would drop, the price to the fisherman would increase, owing to the lessening of the present overhead caused by the public habit of eating fish mostly on Fridays.

Not only the fishing industry but the medical profession are behind the move to encourage people to eat more fish throughout the week. Many have gone on record as to the nutritive and healthful value of fish. With its richness in proteins, minerals and other elements, they say, fish is an important article of diet, as nourishing as other foods and more easily digested.

A FUNERAL

Somebody laid their dead away in the dull gray cold of a winter day. It was not yours—it was not mine—But over celestial hills may shine When the call comes clear for you, for me.

—Nancy O. Parke.

"And do you know anything about religion?" queried the missionary. "Well, we got a little taste of it when the missionary was here," replied the cannibal chieftain.
